Some people on Hackforums are legitimately one of the dumbest people I have ever met, if this is a SnapBruteforcer, all you have to do is change your password to something like E98wqe91239!@82417321 and it won't get "hacked".

You guys are fucking idiots and I hope you all, one day, gain the smallest amount of intelligence so you can atleast comprehend what I'm saying properly.

Its clearly a proxy IP, but does your program say they logged onto a iPhone 5C? Really not sure if I was virtue forced or someone happened to find my password some other way.

Thanks.

Ok let me help you,

Single user mode : Tick the checkbox on and input the username of the user.

Proxy path : click the [...] button to browse your proxy list. Each proxy should have the following format: 127.0.0.1:6000 (ip:port) and be separated by a newline.

Load button : We usually use this to load user[Split Char]pass lists but in this case we will only load passwords(each separated by a newline).

Search ! button : Once all set, click it to initiate the instane.

?

Directions:

If you're trying to hack a single account then simply click settings -> check the single option and enter the snapchat of the person.

Import the proxy path

Then press load and import a password list and press start.

Thats all

If you are having crashing issues it could be either your password list has an unsupported character making it crash or you are using an outdated version of .net framework

As for directions please check the instructions I provided on the previous page.

As for a password list you can simply google and find good password lists... if you really cannot find one then just pm me and I will send you one

Going to post a review on this EXCELLENT product.

I will begin with the support Arrow has provided me since I have bought this product, Arrow has helped me STEP BY STEP on how to hack SnapChat accounts and with his help I am beyond happy. The program has ZERO flaws and works like a charm, the amount of accounts I have gotten from this program makes me think I am in a dream. This product is def worth the money, if you are looking to hack SnapChat accounts, look no further and buy this product. This is probably one of the best investments I have ever made and once again, thank you Arrow for such a WONDERFUL product!
