Thread: [\[Janus\] SQLi challenge #8](#)

JaNuS18 - February 6, 2015, 2:42 am

Hi folks,

Here is my challenge #8 of 10 for M"SQLi circle members (open to others too). ?

~ Tasks ~

- display version with your name
- display list of all tables in primary database with their number of columns
- list should be sorted in descending columns/tables order
- display number of columns in accurate graphics (see proof picture)

~ Site ~

aHR0cDovL3d3dy5sZ24uY28ubnovYnJvd3NIL2luZGV4LnBocD9TZWFyY2g9
(Base64 decode it using online decoder like <https://www.base64decode.org/>)

~ Proof ~

[img]<http://img4.hostingpics.net/pics/313080challenge8.jpg>[/img]

~ Rules ~

- you may not use benchmark()
- your injection should work without knowing anything about database/tables/columns on that site

Post your syntax to <https://privnote.com> (it is automatically destroyed after reading) and send me link to PM

Let's SQL knowledge be with you ?

~ Solvers ~

- themastersinner (by PM) ?

....

Follow ALL tasks. You've forgot the sorting and graphical part.

And why do you post your code ? Want to spoil the challenge ??? ?

P.S.

BTW you show only some tables ... You should use DIOS

Target updated. Thanks for reporting ?

7h3_Ph3n0m - August 11, 2016, 6:45 am

Welcome ? site is easy to inject but i guess the graph part of the challenge in related to html?

kindly update POC also ?

JaNuS18 - August 11, 2016, 9:27 am
