Thread: [Project set ups / Mentoring / Languages aka C++/ VPNS / Account Recovery / Rat + More](#)

Il Divino - February 6, 2015, 11:02 am

I keep getting messages about this people asking me to make them projects so I'm willing to make you guys a project depending in what you want done.

I also am getting messages for mentoring yes I can teach you some stuff like languages but however this is harder than me making you the actual product.

(For the requirements of this is you need skype + team viewer)

I am not certain that you will learn how to program in vb net etc as this depends on you.

My skype is service.hf

If divino.hf contacts you it's not me

Il Divino - February 8, 2015, 3:27 am

Still doing this guys contact me for any work

jacktheturtle - February 8, 2015, 1:22 pm

Skyping you now. Id like some mentoring
