Maybe you should learn how to not be a skid and sales trash. I'm more than certain if you would have pmed Arrow he could have fixed it for you. Instead you go to his sales thread and bug out. LQ as shit.

killamaster7888 - February 7, 2015, 7:06 am

Vouch. Had a problem at first but Arrow solved it very quickly. Checking first scan now and most of them are alive.

derpysnap - February 7, 2015, 7:15 am

Vouch. Had a problem at first but Arrow solved it very quickly!

Now checking the proxies , as i see it checked 1005 until now and 3 works and the other dead/timeout...

i suggest to update the sources.

I need this but don't know if the proxies are good. Is there any chance you'll send me a few proxies to test with Scrapebox? If they'll pass Google check I'll buy the software.

Thanks, waiting for your PM.

Lil Benadryl - February 23, 2015, 3:22 pm

Does this have a filter when exporting the proxies? Also how fast and secure are these proxies usually?

Suits - February 25, 2015, 1:16 pm

Hey I purchased via BTC and I got a confirmation e-mail via coin payments, but no delivery from pay ivy. I know sh1eld said that it was from the buyer not sending the full btc is the reason it doesn't send, but I made sure to send the whole amount. Not sure what the problem is. I e-mail the e-mail you provided in the reply above. Thanks.

Actually, nvm It came like 15 minutes ago but went to my Junk folder. Thank you so very much! Vouch and a +3 for your great service!

Peble - February 25, 2015, 2:00 pm

Are there proxies scraped from public sources such as proxy websites? If so what makes this better than current free tools which do the same? This could be useful for me but only if they weren't just scraped from public sources.

Ok this question will help determine if I buy your product...

I was wondering if these proxys work for an account cracker. that's why I need proxys.

do you think that these will work?

And are proxys what cause a connection to timeout on the account cracker? if you wanna know exactly what I am talking about check out my last thread on HF please thanks Tyler.

Just purchased your product through Paylvy.

Will update everyone personally and officially how it works when I receive it.

This honestly works extremely flawlessly.

100% vouch for this guy.

It scraped like 40k proxies in about 3 seconds.

However only about 20 didn't time out when they were being checked.

No copy and pasting all just a click of a button.

YOU MUST BUY THIS!

Is it possible to extra https only proxys?

tzinos - April 21, 2015, 9:35 am

well i did sent an email, but i didnt see an answer. I cant basically use the program, cause malware malbytes sees it as a threat. riskware.tool.hck for the monster exe and the netseal licence thingy says backdoor.bot. The file i got was from the link sent to my email after a paid through payvii. Now i aint trashing sales or anything, if it was a real threat i guess others would have mentioned it already. Just need an exlanation or updated file.

Make sure you're running the latest version of .net framework. If you're still having issues then lower the amount of proxies you're checking...I check 300k list every morning and out of those I update the valid ones to the checker and it doesn't crash for me :(

It's not just you though...I have had multiple complaints that it crashes. I'll take a look at it once I'm free

DevExpress is being retarded with it. Indeed the remove dead button is supposed to remove all of them but it doesn't at times.

You might want to press the status button on top and have the alive/dead aligned first... then press the Remove invalid proxies button a few times until it says 0 proxies were removed. Will need to take a look at this more this weekend probably

It scrapes about 44k proxies every time. My framework is good so it's not that.

I meant I check 200k lists then update the Proxies with whatever is alive for everyone else to use. There are also external sources which grabs a few thousand proxies which are being constantly updated.

Try lowering the amount of proxies you're checking.

Not sure

There's no lifetime package correct?

No sorry... unfortunately all the work here is manually done by me. I scan a list of proxies I scrape throughout the day and out of ~200-300k list I upload the alive ones every 24 hours. If I do sell a lifetime package the price would be too high.

Is it using netseal?

Yes. Some retards may try to think cracking the program or sniffing it will get them the source of our proxies but I manually update the proxies every day so if it even gets cracked then the person will get the same old list over and over again. This works well because its more alive proxies for our customers and I dont have to deal with kids threatening to crack the tool and leak it.

Thanks for bringing it up. It's supposed to say 1 year, not lifetime.

Getting these many Proxies isn't cheap and the lifetime subscriptions to almost all HF products die within a few months. Mines been running for over 7 months now without any hiccups. 1 year subscription wont go to waste

Hello members of hackforums! I just bought this product and here is my honest review:

It did not scrape 50k proxies like it said it would BUT it still scrapes a SHIT ton 33,000+ which is still a ton of proxies.

The proxy checker is extremely fast way faster than my other one which lags my machine to death.

The proxies that were provided by the scraper were not the best valid rating in the world but still a shit ton were valid which is very nice.

The speed of these proxies were very fast on my cracker.

Overall rating: 7/10 glws! Big vouch would recommend and buy again in future.

EDIT: I also would like to mention the look of the program looks sexy af would bang.

yes the checker says its online but then i checked them via online checker and they're actually dead

i did this because my tool that uses proxies doesnt recognize them and says they're dead (or most of them)

thats why i double check them

Post deleted. But Arrow still refuses to provide support for this product. He simply stated it was my firewall when I have no firewall or antivirus blocking the programs connection. The OP is arrogant and simply does not seem to care about his customers. Will be opening a scam report if I don't receive a fix or a refund. OP You have 24 hours left.

Hey, I have a few questions

Are these proxies High Speed? I bought the lifetime as I was in a rush to purchase a mass amount of proxies but this doesn't seem to be consistent. Could you elaborate on what these proxies are used for or possibly point me in the right direction please.

I need proxies that can of course, hide my ip but also be dedicatedly used for my SneakerBot.

"Could you elaborate on what these proxies are used for?"

To keep it short, proxies are used to mask your IP address.

I'm getting ~ 20,000 as well, but only about 200 are live. I'm pretty sure it's because after 1-2 minutes my internet goes out and it considers most of them to be dead. I'm on a fiber network using ethernet. Then sometimes the program will randomly crash or will stop checking midway; leaving me no way to extract the valid ones from the untested ones, so I have to restart the whole checking process multiple times.

Can you state somewhere in the OP that the program was changed to not show the countries for the proxies? I didn't see that comment (page 69/70?) until after I purchased and now it's like...shit. Wish I had that. Good program otherwise (scraped 20k so far about 650 are valid) but I really was only paying for the ability to get targeted (bad choice of words?) proxies. I just don't want other people to make the same mistake.

Thanks.

Arrow will be gone until Tuesday. Please refer to Arrow's post for more detail.

HyperKing - June 12, 2016, 7:07 pm

Hello! I am HyperKing, I am one of Arrow's support agents.

If anyone has questions or any sale concerns please do not be hesitant to contact me!

SIM-2914476 - June 12, 2016, 7:18 pm

No offense but my Free scraper gives the exact same amount of proxies and at times a lot more - This is a rip-off (All in my own opinion)

He's simply scraping from public websites.

Otis???????????????? - June 12, 2016, 8:50 pm

Hyper and I can help right now.

HyperKing - June 13, 2016, 12:49 pm
