Thread: [HQ Contest management!](#)

Trenchguns - February 6, 2015, 7:25 pm

It's not pretty at the moment, but this is to get the word out as soon as possible. Will try to freshen it up as much as possible in the future.

Who

L33ts and Ub3rs who are throwing a pick a number contest, or something similar, like [this](#).

What

I'll be doing FREE contest management, which means I can post lists, keep them frequently updated (more frequently than a good chunk of contest throwers) pm duplicates, etc. For examples of my work you can check out [here](#) or [here](#) or even [here](#) and [here](#)!

How

If you're already throwing a contest, just pm me the details, and I'll post a reserve spot asap and try to get started on make a list (or w/e needs to be done). Otherwise, it would be GREATLY appreciated if you could pm me ahead of time, so I can pre-compile a list(or w/e needs to be done) and get the second post on the thread, so people can see it easier.

Why

Because I have no life

Vouches!
