techy1 - February 7, 2015, 1:12 pm

Hey guys I am looking for a bot that give fake instagram followers, twitter followers, and youtube subs. I just want to have numbers on my accounts. I dont care if they are real or not. If the program needs an account list I will need one of those too. If there are other methods to getting tons instantly fake followers or real idc. Post them here too. Thanks!

Still looking! Please help me get some IG followers! A program that does this too would be nice!
