Thread: [Email SPAM Prank 3.5 - Prank your friends or your enemies](#)

prilux - February 8, 2015, 12:58 am

Hi all,

New release of Email SPAM Prank, this version (3.5) include 200 spam emails which allow you to fill an inbox with them. This version includes an internal feature that verifies the internet connection before inicializing the program. This is a request made by the crowd, some people were saying that Email SPAM Prank didn't work and the problem was no connection available to the internet. Now it's solved.

As always there is the private version which sends aproximately 10.000 emails but it's still in the oven and need to add more emails. So, new orders will have a delay but i'm able to fulfill in a short period of time.

Exclusively, to comemorate the 1 year release of Email SPAM Prank there is available the Extreme Edition which sends aproximately 50.000 (WOW) spam emails. This Extreme Edition doesn't work with all browsers because of too many connections so exclude IE. The Extreme Edition will knock out anyone email address...

That's all, the download link for the public is available below. We offer support to the public edition so if you encounter any problem, just reply back as i monitor this threats. For orders simply contact by email privateloader@hotmail.com

Gmail blocks out most of the emails sent by the spammer
hotmail only blocks out about half
Also it will show your ip address in all of the spam emails, so i would suggest using a vpn.

Email SPAM Prank comes in two versions the Public and Private. You tested the Public version that gmail blocks and hotmail/yahoo blocks a few spam emails. The private version sends more emails (approximately 3000).

Email SPAM Prank was developed to be used with TOR, and yes, your ip address is visible in all the emails. The reason why the emails are being flag as spam is that a lot of people is using it and the technic used has been widely advertised here in the forum.

The Private version pack, comes with the brand new Email SPAM Generator that has a 100% inbox delivery.

adster - January 5, 2017, 7:09 am

is this spammer still alive?

prilux - January 11, 2017, 2:19 pm

@adster
Yes the tool is still working, visit this thread for version 3.6
