Thread: [\[NEW POOL\] QuackPool!!! Most Recent Hash rate: 400MH/s](#)

High On Quack - February 8, 2015, 9:35 am

Hey guys! I just created a new pool for OmniCoin. I think that the more pools and miners we have the more the crypto-currency can grow. And hopefully this could help to grow the OmniCoin community beyond HackForums and into other MyBB communities.

POOL URL: <http://pool.quackcloud.com>

Abraham Lincoln - February 8, 2015, 9:43 am

Nice work! Mind posting what the pool fee is?

Raoul Duke - February 8, 2015, 9:44 am

I've checked and found this:

The Pool rewards miners according to a PROP system with 0.5% fee.

High On Quack - February 8, 2015, 10:09 am

(Feb 8, 2015 10:44 AM)Raoul Duke Wrote: [\[CITE\]](#) I've checked and found this:

If you guys want me to change anything let me know!

Raoul Duke - February 8, 2015, 10:13 am

The fee is correct but it's the first I see a pool that reward "PROP" and not "PPLNS"

I don't know if it's a good thing or not ^^

High On Quack - February 8, 2015, 10:18 am

Proportional (PROP) means you get paid for the percentage of the work you did. So say you sent 100 shares, and Billy sent 100 shares both at the same difficulty you would both be paid 50/50 even if Billy found the block.

Raoul Duke - February 8, 2015, 10:23 am

Seems to be a pretty fair way to reward people thank you for the information I'll try your pool tomorrow (I have already a work in progress on another one)

Nutar - February 8, 2015, 10:27 am

Thank you Quack! This is a very great contribution that will hopefully be beneficial to the community!

Doctor Blue - February 8, 2015, 10:42 am

Proportional payouts are about as fair as they can get, but PPLNS penalizes sudden spikes to make burst mining less attractive. It was introduced to MPOS because of auto-switching miners. It's none of our business how you set your payouts or fees though :)

High On Quack - February 8, 2015, 11:28 am

We are up to 6 MH/s

Keep joining guys lol.

High On Quack - February 9, 2015, 12:34 pm

We have found some blocks!!!! And our high hash rate is 20MH/s

High On Quack - February 11, 2015, 4:54 pm

We've got a lot more blocks now!!!!!!

Raoul Duke - February 11, 2015, 5:49 pm

(Feb 11, 2015 05:54 PM)High On Quack Wrote: [\[CITE\]](#) We've got a lot more blocks now!!!!!!

I recommend you to stop mining until the problem with omnicoin get resolved.

High On Quack - February 11, 2015, 8:34 pm

Yeah I shut down the stratum server today.

JOJOGANG - February 16, 2015, 5:28 am

Can't wait until Omnicoin's issues with the 51% attack get fixed. When they do, I will be joining your pool and you can expect 1.3-1.5Mh/s to be added on that.

High On Quack - February 16, 2015, 6:27 am

Thanks man! I can't wait until it gets fixed too. Omnicoin and Dogecoin are my favorite Alt-Coins

Mine are Omnicoin and Digitalcoin. Dodgecoin's difficulty is high for the low value.

Omnicoi is back online, please put the pool up soon.

High On Quack - February 25, 2015, 12:46 pm

THE POOL IS BACK ONLINE!!!! Since the pool is small there werent too many problems from the rollback!

Lord.Baltimore - February 25, 2015, 2:27 pm

Good idea, he can protect from 51% attack by de-centralized the hashrate :)

Abraham Lincoln - February 25, 2015, 3:10 pm

(Feb 25, 2015 03:27 PM)Lord.Baltimore Wrote: [\[CITE\]](#) Good idea, he can protect from 51% attack by de-centralized the hashrate :)

Well, not really. Decentralizing the hashrate only protects the coin from a 51% attack the one of the pool owners does.

Anyone can go out and buy enough hashing power to overrule the rest of the network. It doesn't have to be a pool owner.

Doctor Blue - February 25, 2015, 4:10 pm

Seeing how we (mostly you) battled the previous 51% attack, it's probably not as big a risk as the

generally low network hashrate.

High On Quack - *February 27, 2015, 8:11 pm*

WE ARE UP TO 60MH/s. Good work guys :)

dimi1810 - *March 1, 2015, 6:20 am*

The link dont work atm , i see a sms bomber ..

Please fix it and send me a pm :)

High On Quack - *March 1, 2015, 6:22 am*

Sorry guys, I am having an issue with the sms bomber and the pool. I couldnt access the smtp any more from the external server so I had to move all of my sites to the vps. It will be fixed in less than 24 hours.

Pseudonymous - *March 1, 2015, 6:58 am*

I would have brought 1GH/s in but I don't trust 3rd party pools!
