I don't think this exists. To any number is no problem, but not from any number.

Before, i use the site smsglobal, and you can send from any number/name to any number..

afreesms also have that option, but not anymore.. :/

I'll try that .. :) @securityanalyst / @glazed

He not looking for an sms bomber.

I'm not sure where you can find this but you can spoof a number. I know you can do it with calls so I'm sure it will work with messages somehow
