Doctor Blue - February 9, 2015, 2:45 am

At least it's only listed as "Potentially unsafe" by ESET. This is really annoying.

NoMercy - February 9, 2015, 4:58 am

I've voted that it's safe but what dick said it's not safe?

Illuminati? - February 9, 2015, 5:00 am

Voted positive, can't believe people are voting for harmful.

Nutar - February 9, 2015, 5:08 am

Voted harmless! Fuck those lifeless haters who are voting harmful.

DOSH - February 9, 2015, 5:55 am

Voted as harmless, false positives annoy me.

Aceman - February 9, 2015, 7:37 am

Some people on HF who don't want the coin to succeed must be downvoting it. I can't see any situation where somebody analyzing the file wouldn't realize that it's just a standard crypto currency QT client.

3mmi - February 9, 2015, 10:41 am

Voted as harmless, it's really stupid what some people do.
