Chumlee - February 8, 2015, 7:56 pm

Shutting down the USB project - the team abandoned the project and the link to the source code was downloaded HUNDREDS of times when it was only shared between myself and 3 others, as well as been leaked across many forums, youtube channels ect --- I may come back to this again some day but for now...it had a good run. NOW STOP PMING ME :P

4/13/2017

A New USB stealer is in the works! New features to come, options for different steals, and more!
-4/10/2016

[Putting together a team to help make a new one, looking for hackforums best to collaborate, send me a pm or post to this thread and i'll add you to the skype group.](#)

- [Features to come:](#)

[-windows 10 compatability](#)

[-more steals!](#)

[-custom user menu to steal what you want](#)

[-MAKE THE USB STEALER FUD AGAIN](#)

- [Currently have 3 very dedicated team members at work](#)

- [-8/9/2016](#)

4/28/2016 - it has come to my attention that many AV's are picking up on this now, when i released it, it was fully FUD as it is 100% batch code compiled into a .exe I will be removing FUD from the threads title, will make sure the new version if FUD before next release

=====

In spite of catching my now ex girlfriend in the act with my own program, I am re releasing my USB Stealer with the added text/pictures message feature.

[old version and thread with vouches can be found here](#)

Features

Fully undetected

100% Batch code

easy setup

Works with windows xp, vista, 7, 8 (not sure about 10)

runs silently in the background

copies files fast
No Servers
No trace left
No Process shown
makes a beep sound once when finished

Steals

Text Messages (Iphone Backup)
system info
Processes running
favorites
documents
Pictures
videos
.exe
minecraft lastlogin
downloads
mozilla firefox file dump
Internet Explorer file dump
google chrome file dump

Setup

1. PM me for the .rar files
2. put the files onto a usb flash drive (the biggest size you have, you may run out of space)
3. insert usb into computer you want to pull files from.
4. Run the silent.vbs script, NOT the .exe
5. wait for it to copy the files, it goes in the following order: info, pics, texts,videos, documents, various dumps.
6. profit

How to decrypt and read the text messages:

1. Install Perl if You do not have it already from [here](#)
2. Put the files from the text scripts folder into the text message folder created from the stealer.
3. Hold shift and right click the text messages folder and click "open command window here"
4. type this and hit enter: perl backup.pl --directory <textmessages>/"

Virus Scan

[Here](#)

Also due to my program being leached by multiple users and being posted without any credit given or my permission, You must PM me for the most up to date version.

The least he could have done was sent me a personal message to clear things up. If you must know, I have had this program sitting on a USB drive in my drawer for over two years now. There has been multiple threads posting about this. I have not claimed this as my own program nor have I claim to have coded it or been the original provider in any way shape or form. I was simply sharing it with the forum.

The thread I have posted <https://hackforums.net/showthread.php?tid=4659244> is now closed. That is my final say in the matter.

"The least he could have done was sent me a personal message to clear things up." I agree.

"I have had this program sitting on a USB drive in my drawer for over two years now" I know but people should used the search feature and you could have given credit to the creator.

"I have not claimed this as my own" your thread title saying "|| Frankie || USB Stealer" makes me assume it's yours. although it doesn't say "|| Frankie's || USB Stealer" it still makes me assume you made it.

Now it is your turn to use the Search feature and look for almost all of my threads.

|| Frankie || is how I start them out regardless of what they are about. It's just what I do. I will not be giving this thread any more s than what I already have.

I bid you good-day sir.

Don't you just hate it when people like this clutter up the forum?

Not really, you don't have any way of proving it came from his computer. Then you'd have to explain how you got it.

CHUMMMMM!!!! your freakin Amazing man i cant wait to try this??? but hey your AWESOME for making it ???

Uzi London ++ - March 6, 2015, 11:05 pm

I made one of these a while ago all from scratch + a few extra stealers from the interwebz, but I got it to actually autorun correctly. I could just walk around the computer lab at school and steal

passwords. It had a cmd window that popped up and I think I would know how to hide it now, but then I didn't. I also didn't crypt it because I felt it was too much work :D

hyeownage - March 7, 2015, 2:49 am

Dude i need this asap some please send it pleaseeee!!!

Does it have to be in the root of the USB stick to run?

I'm managing to recover my files so it's no big deal anyway.

(Feb 8, 2015 08:56 PM)Chumlee Wrote: [\[CITE\]](#) In spite of catching my now ex girlfriend in the act with my own program, I am re releasing my USB Stealer with the added text/pictures message feature.

THIS IS FREE AND FOR EVERYBODY BECAUSE FUCK THAT BITCH.

[old version and thread with vouches can be found here](#)

Features

Fully undetected

100% Batch code

easy setup

Works with windows xp, vista, 7, 8

runs silently in the background
copies files fast
No Servers
No trace left
No Process shown
makes a beep sound once when finished

Steals

Text Messages (Iphone Backup)

system info
Processes running
favorites
documents
Pictures
videos
.exe
minecraft lastlogin
downloads
mozilla firefox file dump
Internet Explorer file dump
google chrome file dump

Setup

1. PM me for the .rar files
2. put the files onto a usb flash drive (the biggest size you have, you may run out of space)
3. insert usb into computer you want to pull files from.
4. Run the silent.vbs script, NOT the .exe
5. wait for it to copy the files, it goes in the following order: info, pics, texts, videos, documents, various dumps.
6. profit

How to decrypt and read the text messages:

1. Install Perl if You do not have it already from [here](#)
2. Put the files from the text scripts folder into the text message folder created from the stealer.
3. Hold shift and right click the text messages folder and click "open command window here"
4. type this and hit enter: perl backup.pl --directory <textmessages>/"

Virus Scan

[Here](#)

Also due to my program being leached by multiple users and being posted without any credit given or my permission, You must PM me for the most up to date version.

Vouches

ahahah for real tho fuck that hoe ????

hey! could you please send me a copy? thanks in adv!

This first phrase is completely out of place, seems like a marketing opening to me.....nice, i'll use shit like that from now on too

can confirm, have screenshots to prove, updated and released this the night i caught her when i couldn't sleep after the fiasco.

SIM-2137258 - April 12, 2015, 6:02 am

Very Good Stealer thank you very much !

MackeyBlank - April 12, 2015, 3:53 pm

Hey,

My [HF] account is new and I wondered if you could PM me the download link because I can't PM anyone yet.

Best regards, Blank!

it really depends on how much the person has stored on there hdd, if u can use an external HDD, if not at least a 32gb usb flash drive.

arvind1992 - April 20, 2015, 9:33 am

i cant send u msg can please send me in pm

Could i please have it?

Thanks again

tropaect - April 22, 2015, 4:57 am

Well, seems like fresh users cant pm.

So I'd like to ask you if you could send me as "my way" of doing similar work is not so stealth as I don't know how to make the file transfer invisible.

Great job and thanks for sharing.

Oven Mitts - April 22, 2015, 5:10 am

I would greatly appreciate a copy of this. I am trying to get back into learning to hack and want to look at other peoples programs and learn off of them to create my own.

Thanks in advanced. :)

(Feb 8, 2015 08:56 PM)Chumlee Wrote: [\[CITE\]](#) In spite of catching my now ex girlfriend in the act with my own program, I am re releasing my USB Stealer with the added text/pictures message feature.

THIS IS FREE AND FOR EVERYBODY BECAUSE FUCK THAT BITCH.

Features

Fully undetected
100% Batch code
easy setup
Works with windows xp, vista, 7, 8
runs silently in the background
copies files fast
No Servers
No trace left
No Process shown
makes a beep sound once when finished

Steals

Text Messages (Iphone Backup)
system info
Processes running
favorites
documents
Pictures
videos
.exe
minecraft lastlogin
downloads
mozilla firefox file dump
Internet Explorer file dump
google chrome file dump

Setup

1. PM me for the .rar files
2. put the files onto a usb flash drive (the biggest size you have, you may run out of space)
3. insert usb into computer you want to pull files from.
4. Run the silent.vbs script, NOT the .exe
5. wait for it to copy the files, it goes in the following order: info, pics, texts, videos, documents, various dumps.
6. profit

How to decrypt and read the text messages:

1. Install Perl if You do not have it already from
2. Put the files from the text scripts folder into the text message folder created from the stealer.
3. Hold shift and right click the text messages folder and click "open command window here"
4. type this and hit enter: perl backup.pl --directory <textmessages>/"

Also due to my program being leached by multiple users and being posted without any credit given or my permission, You must PM me for the most up to date version.

Hey Bro . i have the same problem " Fuck that Pitch Problem" Over here .
would you please send it to me .
Apreciated Man.

It's some pretty simple Batch Code.

Just get yourself into Batch and you will be able to write this program yourself. This gives you the benefit that you can optimize it to your needs.

I did it myself. It is really, really easy.

Stitch - August 5, 2015, 12:22 pm

May I have it? I cannot PM yet. Sadly..

mroa0416 - August 5, 2015, 3:20 pm

Can I get it, as above I joined today and I'm aware you are on vacation. When you get back please send me the program, thanks in advance.

Unable to PM unfortunately.): Am I able to receive a PM despite not making the post count? Would you mind sending it over to me?

Berithoras - September 29, 2015, 4:44 am

Vouching for this. It's extremely effective for a .bat file.

AMAVI - September 30, 2015, 10:45 pm

Vouch for my boy chumlee!

by chance do you know a guy that happens to specialize in USB stealers?

A++

Quinnisabeast - October 23, 2015, 11:00 pm

is there anyway that you know of to have the file automatically run once inserted into a computer because if so chances are even if the computer you are sticking the usb in is locked ! more then possible it would activate your program and jack everything ! let me know if you can make this start stealing once inserted instead of opened thanks !

Could I please have this? Thanks in advance.

Artificial Sun - January 17, 2016, 3:09 am

10 out of 10 product!

Tried it on a laptop running Windows 8, the files were copied faaaast and my poor 4GB USB didnt stand a chance ?

Big vouch for the USB Stealer, and i highly recommend grabbing a 12GB+ USB for this ?

Deathiant - January 17, 2016, 9:55 am

what size usb would you recommend for this? also i am unable to PM you currently due to the annoying post number limit thingy so could you maybe PM me the links please? Thanks in advance.

HiddenModerator - January 17, 2016, 3:04 pm

vouch for this product, it's amazing

I tried it on a windows 10 laptop and it's super fast

The usb should be bigger when the target has a lot of stuff on their pc (i have a lot of pictures so my usb couldn't keep up xD)

I love it, big vouch from me :D

I think i'm gonna put it on my phone so i carry it with me, i'll be back to report if my mission succeeded

and once more thanks to Chumlee, ur awesome

Viam Inveniemus - January 17, 2016, 3:07 pm

Seems really cool! Posting here to remember this thread.

You'd have to worry about crypting it and such.

There is no such thing as true autorun with a normal USB, so antivirus programs would start going off whenever you plugged it in, which would give away the whole thing.

With this approach that's not really an issue.

Codestroy - December 29, 2016, 4:14 am

Where is the download link? ?

ossifer - December 29, 2016, 4:22 am

Hi,

thanks :) for this software

hpflwhthcr - January 26, 2017, 10:32 am

Hi. I'm a new user in HF and was really interested on the topic. Could you tell me how am I able to get this file? I understood that you have to ask for it, but does e.g. post count & other reputation matter? Also, I understood that this works on windows computer, has anyone tried on Mac? (I know, a stupid question but, want to confirm this)

Cheers in advance!

BlackBanana - January 27, 2017, 8:10 am

I'd love this however i'm not able to PM can you pm me please ?
