Wait what? Dude if you dont know the situation please dont reply. I didn't scam from anyone that was me and my friend's knife if ya want I'll get him on hackforums as well and he can vouch for this. So yeah what happened me and my friend had got a deal of 1.4 btc per keys so we decided to sell this knife and get btc he transferred it to my account and I gave it to Host FR as he offered me \$60 for it so yeah he ran away with my money.

SprayPaint - May 18, 2015, 12:45 pm

This looks like a legit scam report to me. The fact that he ignored you is almost a dead giveaway that it's legit.

I'm sorry you were scammed up, I hope somehow you get either your knife or money.
