You make a dildo shaped air container from lightweight bin bags, fill it with cool air, then leave it in the sun for it to heat up causing it to float.

I have never laughed so hard in my life, this is hilarious.

PureLifeCoding - February 10, 2015, 11:44 am

I am doing this. We should setup a specific day that a bunch of us should do this and try to get it on the news XD

YO I JUST FUCKING NOTCIED WHATS UP THAT MASSIVE FUCKING RADAR DISH IN HIS GARDEN LOOOOOOL

Big black air dildo builder by day
Big black air dildo tracker by night

Deany - February 10, 2015, 11:45 am

...what is the purpose of this thing? ?

Big black air dildo tracker by nightNeighbor had a huge one of those things that was facing the guy across the street. The guy across was concerned that it was transmitting radiation to his house so he got the cops involved etc and the guy removed it, and im pretty sure they just transmit radio waves..

Im laughing too hard at this

imagine if we all decide a date to do this, loads of hf members making 20 foot flying dildos and send them all off that the same time. average something like 600 members online at one, imagine if everyone decides to do this thats like 12000 floating dildos.

mfw russian planes fly over america to invade and their planes engines get clogged with flying dildo and planes crash and US is saved by the 20 foot flying dildo crew of hackforums

What am i doing with my life

LOOOL

Vitani's Mate - February 10, 2015, 10:37 pm

I actually own one of those flying giant dildos.
VOUCH! 10/10 WOULD USE AGAIN!
