Thread: [\[EVERYONE\] Free Mail Host | 24/7 | Unlimited mail send/receive | 100% FREE!](#)

SwiftBot - February 10, 2015, 8:03 pm

i decided to do this because I run my own 24/7 mail server for my SMSBomber. You have no limits, you can mass message etc. Bottom line is the server can handle it. No logs are kept and you can send as many messages as you want. (Gmail only lets you send 5000 messages a day)

You get to send unlimited.

Please post in this thread and I will PM you.

Once you get your account you can connect via (Mac's mail app) Outlook etc.

Connection information:

SMTP, IMAP, POP Details: swiftserver.ddns.net

Username: yourusername@swiftserver.ddns.net

Password: Your password

Why do you need this?

You can use this to send unlimited emails and talk to your friends.

Scy7e - February 17, 2015, 3:21 am

Just wondering, what's the catch? You are giving this for free and risking your host being marked as a spammer?

SwiftBot - February 17, 2015, 8:08 am

(Feb 17, 2015 04:21 AM)Scy7e Wrote: [\[CITE\]](#) Just wondering, what's the catch? You are giving this for free and risking your host being marked as a spammer?

There is no catch. This is just being used for my SMS Server. And SMS server's don't get blacklisted. I mean if you could donate it would be awesome but otherwise this is completely free.
