Thread: [High Quality crypts. Private Crypter - Polymorphic](#)

Che Guevara - February 11, 2015, 8:39 am

Hello,

I am offering crypts done by my private crypter.

Crypter is polymorphic. Each crypt is unique than the other. Crypter is written in Delphi with inline ASM.

Supports .net malware as well.

Can crypt .dll

Price \$30/crypt.

Payments accepted BTC/PM/Skrill/WMZ

\$20 for the first 3 buyers(Gone)

Can do it over TV and scan your server before you pay.

Any questions PM me. Any LQ posts will get you a -3 and report.

I do vouch for Che Guevara, he knows what he's doing!

- I did buy his crypter last week and it's still FUD.

How big is the file size after crypt?

Che Guevara - February 12, 2015, 5:03 pm

It would go up between 48-60 KBs depending on the malware.

New engine is released. Crypts are even better now.
Online and taking orders.

Interesting, how long is the FUD time. Considering its polymorphic it should be dependent on how I use it. Please excuse my scepticism, this is Hf, so I do tried carefully. I must see to believe.
If I where to buy I'd need the following things.
You to TV the execution of 2 of the same file cryptic twice, and see the hex of the files to see how polymorphic it really is.

I may buy in the future, but I'm on the poorer side.
