I'll be back for more in the future dude, I promise you that. ?

CH20 - February 27, 2015, 9:50 pm

Huge vouch!!!!!! I can't express how good of deal this was and how amazing of a job he did for my personal logo revamp and custom YouTube banner with a matching avatar. I've had 3 other designers try to make me a logo and none of them stood out, but Narwals got it on the first try. The best part about it was he is 3x cheaper then all of them and just as good if not better. Will be returning for sure if I'm ever in need of more graphics.

itsMeCherry - March 1, 2015, 4:05 am

Bought an animated banner of him. It looked so professional and neat. THANKS

For an unknown reason, only some people have been having this issue. I've made sure nothing is set to make it do that but I'm going to contact the host to figure out why.

Secret Agent - April 26, 2015, 8:30 pm

Vouch! Made me a great avatar and logo at a very affordable price. Followed all my requirements without questions. Highly recommended and would order again soon!

Muro - April 29, 2015, 5:15 am

Alexander K - May 7, 2015, 2:23 pm

Vouch for Narwals. He's designed a forum logo (several), user bars (several), and an avatar. What I can say about him:

Personality

Very motivated, kind, easy going, patient

Labor

Cost effective

Skilled

Creativity

I was very pleased and surprised with the quality of work because I had asked some other people before him for these services and they were either too expensive or lacking vision.

Overall, I am very happy about working with him and would recommend him to anyone who wants quality graphics.

Dexter - May 7, 2015, 7:52 pm

It depends on the design you happen to be looking for. I specialize in vector-based logos and other designs. Send me a PM with info and I'd be glad to help

(Jul 21, 2015 10:49 PM)ChillBoi Wrote: [\[CITE\]](#) Wow! Nice unclickable buttons on your thread!!
The buttons are certainly clickable. They're images. If I could run HTML5 in a mybb thread, I certainly would but for now they're just images with links.

Narwals - December 20, 2015, 8:43 pm

Bumping this thread because I'm getting back into the graphics side of things. I can still do website development and have been for a little bit now. My last design was <http://rogue.rip/>

I'm interested. I have about 5 different projects I need web-designs doing on.
What is a rough guideline on the cost of your work?

I have a lot of graphics related work that I feel you could help me with, however would need to push a couple through first, to raise funds for the other ideas I have.

I'm fairly flexible when it comes to costs. I'm also human so I won't be asking for too little.

Depending on the depth of each project, it can range anywhere from \$30 to a few hundred. If you'd like to discuss further, send me a PM.
