What do you need?

TeamViewer || Windows 7

What will I be doing?

Providing you with a complete anti-forensic service that will include but not limited to disabling timestamps, removing USB logs, disabling restore points, and providing you with software as well as information to secure yourself.

1) No refunds.

2) Your patience will be required throughout the process as this can take up to 30 minutes to complete.

3) Any questions or concerns that you may have need to be asked and address before I begin work. Once I start I will not be stopping to answer questions.

4) My network connection is known to go off-line at random times due to attacks. If this happens your patience once again will be required for me to get myself back online which should take no more then 5 to 10 minutes.

Just a little suggestion. Go a little broader than only Windows 7, you'll be able to help more people this way.

But yeah, good luck with your service m8. ?

I am currently learning Forensics for other OS's and platforms as well. For right now I only offer windows because I am most confident when dealing with this OS. Thank you for the kind words ?
