Really Simple Tutorial For Private Investigation & Anonymity Starters: Unresolvable Skype

Skype is a really nice application that is used by many people in the world. The sad thing about it is, it can be resolved, giving out your IP address, which is a big part of your anonymity in the cyber world. This really simple tutorial will be teaching you how to hide your IP address on Skype.

1. Getting a Fresh New IP

There are many ways of getting yourself a fresh new IP. You can do this by simply spoofing your router mac address or resetting your router or you can even contact your ISP and they will do it in a second for you. Before changing your IP, be sure you have exited Skype. After you got your new IP, do not open Skype!

2. Finding a Nice Proxy Server

Now, its time we get our fake IP address which we will be using for our skype, aka proxy. (If you already have a proxy host:port address, skip to part 3) Lets start searching for our proxy. Hidemyass has a nice proxy list here:

Code <http://proxylist.hidemyass.com/> Choose any proxy you like. Prefer faster ones! ?

Now, what you have to mind is the IP Address, Port and Type

3. Making Our Registry

Now, we need to make a simple registry for Skype and attach it so our proxy will be connected. Create a new file and name it 'whatever.reg':

After you have your registry file, right click it, click Edit. Paste in the following 'code':

Code Windows Registry Editor Version 5.00

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Skype\Phone]
```

```
"DisableSupernode"=dword:00000001
```

```
"ProxySetting"="your proxy type"
```

```
"DisableUDP"=-
```

```
"ProxyAddress"="IP:Port"
```

```
"ProxyUsername"=-
```

```
"ProxyPassword"=-Edit ProxySetting to: "HTTP" | "HTTPS" | "SOCKS5" or whatever etc.
```

```
Edit ProxyAddress to: "your_proxy_host:port" (For e.g: 123.45.67.89:123)
```

Don't touch other settings, save your file and close it. Now just attach it to your Skype by double clicking it.

4. Finishing Touches

At last, run Skype! Now your Skype is connected to the Proxy Server. Now lets make it a bit secure by going on: Tools > Options > Advanced > Connection and enable "Allow direct connections to your contacts only".

Exit Skype fully, and restart it. You're good to go now, skids won't be able to ddos you now. Thanks for reading my simple ass guide. Be ready for my "Staying Anonymous | Undoxable God ?" ebook! Feel free to ask me any questions :)

Edit: If you fuck something up, here is the script to reset the settings:

Spoiler ([Click to View](#))

Code Windows Registry Editor Version 5.00

[HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Skype\Phone]

"DisableSupernode"=-

"ProxySetting"=-

"ProxyAddress"=-

"DisableUDP"=-

"ProxyUsername"=-

"ProxyPassword"=-

FRANKIE - February 11, 2015, 6:41 pm

Great tutorial, you have done it again Fortune!

D4T4B4S3 - February 11, 2015, 6:43 pm

Exactly, thanks for this should help some people who don't know about hiding them selves from Skype resolver's.

lean - February 12, 2015, 4:26 pm

Good tutorial Fortune! hope you make more HQ tuts :)

logging*machine - February 12, 2015, 4:38 pm

Or be a smart individual and DO NOT FUCKING USE SKYPE.

D4T4B4S3 - February 13, 2015, 12:42 pm

Some people just like skype. Thanks for the comments :)

Atox - April 9, 2015, 8:00 am

Love it, very helpful for people on a skill level like my own.

Hire - April 9, 2015, 8:10 am

Thanks, will start using this right now.

The Judge - April 9, 2015, 9:30 am

This isn't an ebook why is your title so retarded..

NoScript - April 9, 2015, 12:38 pm

This is a really good tutorial, I may refer a few people to it when they ask anything about making there Skype ssecure from resolver's.

Klavato - April 9, 2015, 1:35 pm

Thanks for the help man really appreciate it

Infernumi - April 9, 2015, 2:51 pm

Thanks alot for the quality tutorial Fortune! :) really appreciated. I will definitely use this for my skype.

Alderan - April 10, 2015, 9:22 am

Thanks Fortune for this useful information. I shall take action straight away. Have a great day.

SiStemiC - April 11, 2015, 4:15 pm

Thanks! Bookmarked. Really helpful :D...

Toxic Hacker - September 21, 2017, 3:36 pm

Pretty good, but not the best method ;c

Nice bumping very old threads.

?Criminal - *September 21, 2017, 6:55 pm*

The best method is literally DLL injecting an anti-resolve.dll into the skype.exe process, a funny trick to do is spoofing the IP so when someone resolves you it shows a department of defense IP funny way to mess with people, if you know about game hacking then modding skype should be like second nature.

Amarok - *September 21, 2017, 9:29 pm*

Or you can use Discord instead
