Thread: [Retarded brother downloaded a CinemaP-1.8c adware](#)

?u??? Code - February 12, 2015, 1:25 pm

How the hell do I remove this virus? Even Avast anti-virus & Malwarebytes failed to do so. Thanks a lot in advance!

HoshHash - February 12, 2015, 1:27 pm

Is there any ads that are popping up? If so whats the name of them?

Your current OS is Windows right? If so follow these Instructions.

Hey there my name is Farfar and i will be assisting you today, I want you to follow my instructions from now on. If you dont want to follow my instructions please wait so another member can assist you with your problem.

Before following these instructions, look for Malicouis programs that you can uinstall from: Programs and Features/Uinstall or Change programs, in Control Panel.

1. Please boot your computer in [Safe Mode With Networking](#).

2. Download and Execute [MalwareBytes-AntiMalware](#). Complete the installaion and agree Of the terms of service/use. Once you have finished the Malwarebytes installaion go ahead and open MalwareBytes-Antimalware (If not already Running) Make sure that you updated Malwarebytes Database before you are running a scan. Once you have updated the Database, go ahead and Do a threat scan and once the scan is finish press the "Quarantine all" button.

Pictures

Spoiler [\(Click to View\)](#)

3. Download and Execute JRT there should popup a CMD window on your screen, Agree of the terms of service/use and Press enter to begin the scan.

Spoiler ([Click to View](#))

6. Post all the logs [here](#) or [here](#) separated once all the scans are finish.

Download [Malwarebytes-AntiMalware](#)

Download [JRT](#)

Download [Adwcleaner](#)

Download [Rkill](#)

Thank you.

What virus do you have? There are over 5 millions currently recognized pieces of malware.

Edit: nvm I read the title follow these here

<http://malwaretips.com/blogs/ads-by-cinemap-1-8c-removal/> and skip the Hitman Pro scan it pointless. Follow everything else exactly.
