Ugh another fucking forum

The themes nice, but be careful with nulled Xenforo. All it takes is for a small takedown notice to fuck your site up

I actually really like it, it's got content in each forum and the theme is nice.

Hopefully you can grow with it.

Looking to promote the shit out of this one. Looking for some mods to help. I will be doing a lot of work on it this weekend..

Hit me up if you might be interested in becoming a mod.. As long as I can get it active should be hard to rank page 1 of google for the term Call of Duty Forums :)

Actually we are on page one as of today..

Google Call of Duty Forums

Ill just need to make it active..
