It was a mistake to purchase DarkBooter. I bought it before and it didn't even hit 1Mbps. I tried contacting them but never received reply.

Visit <https://hackforums.net/forumdisplay.php?fid=232> for more stressers. I would recommend ipstresser or vdos, they're pretty good booters.

I highly recommend vDos, or try nulledstresser for a free boot every 24 hours.

120 seconds though.

I would recommened Nulledstresser.com

Hits hard asf

Can down homeconnections/websites

Alright Thanks, i Started using NulledStresser but it seems not to be doing much when i do it? could they possibly be using a VPN?

Also When using NulledStresser What Settings Do i use when Taking down a home modem.

Use port 80 with ssdp. Nulledstresser only lets you boot ever 24 hours unless you buy it.

They either have good ddos protection, or you are using the wrong method.
