Thread: [Crypter Source Code](#)

Rhyno - February 15, 2015, 9:17 am

Anyone have a source code for a crypter I can play around with? Trying to learn and become an expert at VB. However this probably wont help me, it's just, I want to make my own crypter.

Thanks,

Rhyno ?

I wish you the best of luck although you are probably in for a rude awakening if you couldn't be bothered to search HF

I dont own any of these!

I did not help make any of these.

I just found them in a pack and removed the garbage.

ALL credits to the original creators. their names should be in the source somewhere.

i dont want to get into the whole "omg you infected a source" which is nothing more than a text file.
i even showed you the file list.

if you can not look at code and see if its doing something then you should leave.

If you're too scared to open it, don't.

Two of my crypters are in there. Through the file list you can tell at least mine were obtained through .net reflector or a tool of that sort.

Anyway, good collection
