Thread: [Powerful Hard-Hitting Stresser?](#)

Agent67 - February 15, 2015, 9:32 am

Hello World!

I've been looking on numerous sites for a decent stresser but i still haven't found one. I've used HornyStress which is excellent! Other than that i've had no luck with taking sites offline. I'm not willing to invest in a BOTNET just yet , but may do so.

If you could link me with some good strong stressers which can take sites offline i would definitely check it out :)

KlaidasKlaidas7 - February 15, 2015, 9:35 am

<http://www.networkstresser.com> is pretty good, i've used it.

Agent67 - February 15, 2015, 9:40 am

I've heard network stresser is good , but is it strong enough when it comes to Layer7? i'm mainly looking for a Stresser that can attack via Layer7.

GoldSpiderr - February 15, 2015, 10:31 am

XyZ Booter have great layer 7 attack methods :)

Titanium stresser is a very loyal booter its been years around , Should work fine

Ex1Le - February 16, 2015, 11:51 pm

My stresser has hard hitting attacks, We offer Joomla Reflection as a layer 7 attack. Along with private methods and EXTREMELY strong NTP. Its only been up for 6 months now, but runs on 15 servers with a semi low client base to keep the power high. <http://exile-stresser.net>

You might want to take a look at server stress testing in marketplace.

Agent67 - February 18, 2015, 5:15 am

when i tried to sign up to your site i got the following error "could not open socket."

Layer 7 is measured in r/s (requests/sec) not Gbit/s
