Thread: [IonCube encoding service](#)

BanananaKing - February 15, 2015, 6:39 pm

I recently purchased the Cerberus license for my computer and forgot to tick the box that applies account credits to the payment, so now I'm stuck with 200 credits (40 encodes)* on my online encoder, which I'll never use because I have the more advanced encoder that has more options.

Because of this, I'm looking to make some of my money back from them, so I'm going to sell encodes, both online and Cerberus, to anyone who wants them. I accept bitcoin only to avoid any chargebacks or issues and since the Cerberus is more expensive and customizable, I'll be charging more for it.

Prices:

Online encode: \$0.50 per file (face value, same price as they charge, just getting my money back)

Cerberus encode: \$2 per file

BITCOIN ONLY

PM ONLY, NO MESSENGERS

If you want a vouch encode with Cerberus, I will do that, however there will be a time expiration, meaning your file will stop running after an hour of the encoding.

Specific negotiations can be worked out via PM. Be sure your file works before submitting, I'm not wasting my time waiting on you to fix your scripts.

Proof of Cerberus license:

Spoiler [\(Click to View\)](#)

Online encode options:

Spoiler [\(Click to View\)](#)

Offline encoding options can be found in the online documents (too many to list manually).
