Thread: [Acid Bounce | GDI Game | Flappy Bird Spin-off](#)

SubGenius - February 15, 2015, 7:24 pm

Hey,

So, I thought it would be cool to make something in GDI, like a game for example and voila.
Acid Bounce.

Intro

The gameplay has a lot similarities with flappy bird except you are not a bird, and you don't fly. All you have to do is pass trough the incoming obstacles without touching them or touching the top and bottom walls.

You can control the box's gravity with 'space'.
You can pause the game with 'escape' anytime.
Every 30 points the obstacles move faster.
You can't change the score with CheatEngine (I think.)

Source

[Source Link](#)

Download Links

[Without BG music \(135 kb\)](#)

[Normal Download \(6.1 MB\)](#)

The source is commented enough.

Have fun playing, don't forget to share your scores here.
?

iGuessSo - February 15, 2015, 8:00 pm

I wouldn't doubt that you can change the score with CheatEngine, just that you haven't figured out how to :P Looks like a fun game though.

SaketSaket - February 16, 2015, 12:10 am

Looks intersting... will surely look into code...

Xghost7 - February 16, 2015, 12:23 am

Wow nice mate, will be definitely looking into the source.

SubGenius - February 16, 2015, 1:31 am

Thanks guys, although i just noticed some variables are not being used because of the changes I made while coding.

Except this, have fun playing. :)

SIM-1847363 - February 16, 2015, 3:53 am

Great to see something different in the vb section its refreshing. Love the game, its hard to play but you did a great job.

Security Analyst - February 16, 2015, 6:27 am

New Flappy Bird 2015, Seems nice ^^

RandomUser123 - February 16, 2015, 6:33 am

Jumps seem too easy. The real one was hard because a jump was a bit less than distance of pipes you pass through.

Btw n1 ;)

iTeDDy - February 16, 2015, 8:10 am

Looks pretty amazing! Thanks! ?

zeroexp - February 16, 2015, 9:03 am

Managed to get 14!

Nice game mate. I looked at the source too ^_^

SubGenius - February 19, 2015, 12:55 am

Yo, I know you are familiar with GDI themes, could you possibly contribute by updating the interface?

(Feb 16, 2015 10:03 AM)Wops Wrote: [\[CITE\]](#) Managed to get 14!

Nice game mate. I looked at the source too ^_^

I have never get more than 20... and I even coded this shit and I know how it works.

IISP33DII - February 23, 2015, 6:14 am

awesome game dude, will have a look at the source right now!

?k!LLabi?s.~ - February 23, 2015, 6:18 am

Cool game, very good job, i got 18 ^_^

titanbullet - February 23, 2015, 5:09 pm

20,like a boss B|

JK,Great game! Kinda rare to make games with vb.

deiski - February 23, 2015, 10:05 pm

I have been through many computer games that make me focus really hard to know to not get scared at the end (screamer)

SubGenius - February 24, 2015, 8:28 am

Just updated the colors and removed unused variables I saw.
There is also a change to make the game easier...

You can update the source from here:
<http://pastebin.com/TDnaK9XC>

Nah m8 u wot.

tweety - February 24, 2015, 8:31 am

Seems like a nice concept and game, really cool. However, GDI is not the way to go. I consider it abuse lol. You should look into actual game engines.

Minimal. - February 24, 2015, 8:33 am

By the first look, this looks like something Thr made back in the day~

SubGenius - February 24, 2015, 8:40 am

For such a simple game GDI is a must.

Ya ya, <https://hackforums.net/showthread.php?tid=4148499>

U right, I had never saw his thread tbh.

FRANKIE - February 24, 2015, 8:48 am

I am going to mess around with this source a bit. Thank you for sharing!

z8sr2dx024 - March 29, 2015, 11:18 pm

hahahah bro thats so awesome!!! teach meeeeeee!

Is GDI+ a language? Whats the viola and acid bounce?

juliando - March 30, 2015, 11:01 am

Ha ha thanks, i go look the source now :D
