mrifong - February 16, 2015, 4:50 am

Hey Guys...I'm looking for a botnet strong one i need to take out a server with weak DDoS protection..10GB Max.. Any one selling and if so how much does it cost for one week renting and if you can take the ip down for me i will pay 50Dollars..Btw this is the ip:185.57.188.238 i took it out before but i can't now no idea

Thehackerguy1 - February 16, 2015, 4:53 am

I can do?, what is the payment type?.
And you will go first because you joined today.

Furorem - February 16, 2015, 4:54 am

If you are using that Botnet to DDoS, you are on wrong road. Better to use Stressers or else, you need lots of bots to take down even home connection. Or rent few VPS and link them together with DDoS script and start nuke? ?

But really dont buy/rent botnet for DDoS, thats just my tip for you.

mrifong - February 16, 2015, 4:55 am

Yah no problem Lol i will pay with paypal If that's okay :)

Thehackerguy1 - February 16, 2015, 4:56 am

Yes, i will take down the target and you pay me alright?. 20\$ first, if the target is not down you get the payment back with a strong booter free.

Wait, did you're statement mention "couldn't take it down"?. Your English is seriously impeccable. I doubt why are you supporting a new coming wanker.

I do not want you to support me, just asking.

And you are not as great as you think you are if you stalk each and every of my respective statements.

Here are you're proof's of being LQ.

Be honest and say you are inferior, before you start to collect information be assured i am LQ. Happy?.

I know you are a wanker, do you know what happens when you throw stones on shit. That is what you are and that is how low you can get.

And how can you say my "awesome" booter did not work?, have you logged into the booter and checked it?. Get you're facts right before you whine like a 13 year old anonymous kid.

Your signature mentioned "easiest cash you will ever earn" and you posted give me 1\$?. Why so? because of the LQ level too much in your body?.

What do you mean "wrong road", I use botnets specifically for DDoS, so do a lot of other people. I know stressers are good, but those are based on the speed of your VPS. Rather than botnets, it depends on how many bots you have. Botnets on HF are mostly used for DDoS, because botnets that steal financial information, etc are banned off HF.

Now, I tried one of the best stressers (vDos), and targeted my friends IP. He said there was no affect at all, this is why Botnets are a lot better for home connections even, because if you want power, botnets are for YOU.

__Digital__ - February 16, 2015, 10:11 am

The answer is not in how many bots you have..... It all comes down to your infections upload speed to determine if you can drop something..... Yes more infections increases your chances of dropping something... Still comes down to infections upload speed
