Doxing Tool

The point of the tool is setting everything in one program and the program is free!. ONLY WINDOWS;(srry

Functions!

1.Database Search

Spoiler [\(Click to View\)](#)

In this function I give you 3 public databases, and you can insert a database to search aswell anytime. In this function the tool will scan the databases and give you the lines where it found the word.

2.Whois Lookup

Spoiler [\(Click to View\)](#)

A whois service with over 30 servers. You can add other servers aswell.

3.IP Lookup

Spoiler [\(Click to View\)](#)

A simple IP lookup function.

4.Traceroute

Spoiler [\(Click to View\)](#)

A normal traceroute function!

5.Skype Resolver

Spoiler [\(Click to View\)](#)A skype resolver with skype to IP and IP to skype.

6.Dox OrganizerSpoiler [\(Click to View\)](#)A little dox organizer that makes a dox file for you.

How to get it?

Just pm via hf or skype(axej.1) or jabber(mist@wtfismyip.com). You will get it for free!

premium accounts here on HF are just pocket change.

take into account, the price of a TRUE blackhat operation. (\$1k+)
(not some cracked bullshit someone hosted on a \$5 hosting company.)

and then consider the potential tens of thousands of users,
who now trust me because i decided to spend \$20 here at HF.

Pretty self-explanatory. The virus scan is false positive. MSIL is just compiled code.

how does being a l33t change anything about a person?

in fact, ppl will buy l33t just to be able to spread their malware here.

Unbeatengiant - February 16, 2015, 8:55 pm

Thanks for sharing this, will be very useful :)
