Thread: [Free web stresser| 15gbps+|Custom Source](#)

CheckFallen - February 16, 2015, 1:56 pm

Hey guys today i am offering a free stresser to the community. I have a few servers that i have laying around and decided to give everyone a free 120 second max boot time on my site. You will have unlimited attacks one after the other. I do not have dstat for this but i assume it is hitting over 15gbps (two spoofed dedis) Just sign up and you will instantly get the time. Please leave feedback ?[img]http://i1294.photobucket.com/albums/b616/thafallenones/moab_zpsf043b749.png[/img] Site is: <http://boot4free.com/>

You have two spoofed dedicated servers, but you think you are only hitting over 15Gbps? Damn...

If I make a account will it be a Lifetime?

Might as well take that "15Gbps" out of the title because with the "Release" of this it's going to drop to like.. ".2Gbps".. Oh well good luck.

The process is automatic I do not need to manually edit the users. Literally everyone that signs up will get 120 seconds of free time.

You cant do anything on this site related to a stresser unless you are uber, even free stressers have to be posted in the SST section
