Thread: [fake victims with my ip addres!](#)

emsky20 - February 17, 2015, 8:42 am

[uppix.com/f-Untitled54e36e9700185cd1.png](#) its a image of screen shot!

Why show up fake victims all of time! one ip addres is different and one is myip! how to solve thise and why its happen all time! somtimes apear 10fake victims!

please help me :(

PureLifeCoding - February 17, 2015, 8:43 am

Maybe you ratted yourself? I'm not sure how this would happen...

emsky20 - February 17, 2015, 8:45 am

before i ratted self but i have already reinstal pc with new windows ! and i have good antispysware and i have no active virus! :(

PureLifeCoding - February 17, 2015, 8:46 am

Maybe those two victims are on the same network and the one with your IP is another pc on your network?

Your problem is virustotal. Happened to me. Don't scan your shit with virustotal. They distirubute. You basically hit a honeypot.

you see in my printscreen thise victims? ip show its Moscowa and one is my ip! and i have not rated pc on my network! when i turn on DC apear real victims and time to time apear 10 and more victims with different id ! its all of time! its possible to someone somting do with my rat server ? and want to trace me or another thing ? sometime apear red victims,i mean victims with red words and ip! all words and numbers in red color! but now i have normal white fake victims! maybe someone have been thise problem what have me :(

NullServices - February 17, 2015, 11:56 am

Don't scan your file ever on virustotal.com It will cause problems like this.

ubnt123 - February 17, 2015, 12:56 pm

yea as SwiftBot don't worry they are not honeypots if you didn't scan then its one of your victims upload it to scan and analyse,if you are a programmer then you can add a specific code (depending of the Rat,worm,bots you use)to bypass a virtual machens which people mostly use it to analyses

viruses
