Mad Hatter - February 17, 2015, 10:23 pm

Hey guys I have a website that has a bunch of stuff and I only need a little bit of it so like this:

StuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffSt
uffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuff
StuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffSt
uffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuff
StuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffSt
uffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuff

Ineed - Ineed - Ineed - Ineed

StuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffSt
uffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffSt
StuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffSt
uffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuff
StuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffSt
uffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuffStuff

So the part that I need is in the format above:

something - something - something - something

I can't use a getbetween or anything like that because it's enclosed by <p> tags which is all over the website. How can I get only the part I need using regex. Any help is appreciated, thanks ??

Only3 - February 17, 2015, 10:39 pm

try something like (\w+ - \w+ - \w+ - \w+)

Mad Hatter - February 17, 2015, 10:45 pm

Nope didn't work hears an example: 1092838992 - <http://www.google.com> - Wrong - Google

u should be more clear when u ask q'
(.*? - .*? - .*? - .*?)

Mad Hatter - February 17, 2015, 10:58 pm

I'm sorry about that, I tried to make it as clear as possible, thanks for you're help though! You're the regex you gave me worked. Thanks a ton!

Only3 - February 18, 2015, 6:41 am

if the format for all the same then u can use (\d+ - .*? - \w+ - \w+) too
