I will go first and after setup will post details about this service.

botrus - February 18, 2015, 11:35 am

What is your hosting located @ and do they allow malware and fishing, I don't think it's Bullet proof it's for \$10 for 1 year of hosting.

As stated in a previous post, please provide some information about the host.

(Feb 18, 2015 12:38 PM)Hazy Wrote: [\[CITE\]](#) As stated in a previous post, please provide some information about the host. 1 month offshore hosting from blazinhositing.net or with same price from Namecheap for 1 year, Namecheap don't allow Botnets. But never get taken down there with "Small" nets. That hosting company is full of malware because that allows Bitcoins & it's quite cheap hosting provider, one of my own nets are running there now 7th month a row with no problems at all, if customer aren't happy for hostings he can also take that 10\$ packet and provide his own hosting & domain.

Ofc Offshore hosting is best choice for all malware. ?

hahaha, i'm waiting about 1 week, really i bored for report this idiot for 25\$, maybe he need the money for buy porn, and stay in the home all day :) GOOD LUCK with the 25\$ baby.

Furorem - September 27, 2015, 10:13 pm

Nice, someone has been scammed some certain amounts of \$ from some of the people.
I havent been online almost in a year, since i got senteced in my country.

So, i cannot refund any of those funds what someone has been scammed. I feel really sorry about those situations, and i dont have nothing to do with those. I have changed my passwords and contact emails, so i think my account are more safe than earlier. So if you got scammed by "me" you can contact me via PM and show some proofs. Lets see what we can do.
?

ONLINE! ready to take orders!

Furorem - October 2, 2015, 1:26 am

That thread can be closed, its not up to date and im not allowed to edit topic anymore unless im not Leet or Uber.

Im opening new thread where you can order same services what i offer you here, ofcourse i have added few nice extra features to my service and lots of more sourcer where you can choose or import your own.

While im creating or looking skilled gfx master to create layer for me, you can contact me trough that thread or via PM.

Thanks for patience, see ya soon! ?

Edit: Inna future, that service includes Bulletproof & non Bulletproof hosting with .ru domain, hosting is also from Russia.

Furorem - October 5, 2015, 12:07 pm

Still providing this service a while!

Working with my reseller license for bulletproof hosting, a while you can order this service with topic details!

?

Furorem - October 6, 2015, 11:45 pm

People, Really dont come order from me if you dont have real business with me or you dont have any knowledge that what you are going to do.

Only requirement by me = You know atleast something about Botnets, its waste of time to setup and mentor persons who dont have never touched these kinda tools. ?

Also this is for EDUCATIONAL purposes only! I am not responsible for the any of actions what you do with your setup.

So welcome!

This can be closed, created poor graphic design and updated details for the setups. CLOSE!
