Thread: [Private Proxy Browser FREE No PM Direct Download](#)

BotMarket - February 18, 2015, 5:18 pm

[Video: <https://www.youtube.com/watch?v=GEdQBbMfey4&feature=youtu.be>]

What will this software do?

You can load a list of proxies from a txt file.

You can set a timer to wait until the next proxy is loaded.

You can click the "Pause" button use the browser (Do whatever you want to do) Then click run to load the next proxy.

Not sure of what use this is but i thought i would share it anyways. Maybe you guys can come up with some ideas on what to use it for.
