Would you like your website to get tons of views a day?

Using the Website Viewer With Proxy And Private Proxy Clicker
it is simple. All that you need to do is load your proxies, enter the website you would like to view and the time to view the site.

And have then run the program.

With this software you can get as many views as you have proxies.

It will also click random spots on the website.

(this could help your advertisement account)

I do NOT CLAIM this is adsense safe!!!!

Instant Download \$5 (Includes Lifetime Updates)

Design (8/10)

The design was a nice simple but decent layout!

Easy to use (10/10)

This was so easy to use that like if you told someone heres a program. They wouldn't even ask what it is and what to

Overall (18/20)

This is a nice simple ebook and can get your website views very quickly!

Too bad I can't design much :p I would change the "for a thread design" to "for a thread design and

review"

Could we set a delay on the auto-click on page feature?

E.g if we're using this for adf.ly and we have to wait 5 seconds.

BotMarket - February 18, 2015, 10:23 pm

The auto-click is not the best ATM its just kinda random..... Keep in mind this is version 1 of my software.... The main purpose of this software is to boost website views. The clicker is just kinda a bonus. (It may work or it may not)

I'm a little lost..... are you asking if you can use this with PPC? (Pay per click)

If so depends on the advertiser i'm pretty sure if your using adsense you will get banned
