Thread: [The EASIEST and FASTEST way to verify phone numbers under 5 seconds \[Google Support\]](#)

Nikolayev - February 19, 2015, 5:24 pm

Update(23/02/2015) : 15 New numbers added to the website. Don't Forget To Support us !

Hello everyone, after 2 years of success of my first web application [isubscribe.ma](#) and the tens of thousands of subscriptions given. I'm glad to come up with a new service that will soon revolutionize the way sms verification works.

There was a lot of confusion and some people did not know exactly how to use it, and they were just testing Google.

This is why I came up with a second version of the webservice, that shows with each number if it can receive sms from Google or not.

So there are three types of numbers :

- Can Verify your google account during signup : means it can verify your google account during signup without problem.

- Can Verify your google already created google accounts : if you already have a google account created and you want to add a phone number to it to verify it, you can use those numbers

- Can't verify your google accounts : pretty explicit.

The website gives information about each number if it falls in any of these classes.

Well this was for google only since it imposes strict rules, but all numbers can verify most web services.

How To Use :

- Simply go to the following URL : <http://phoneverify.co>

A phone number will be generated for you, scroll down at the bottom and you will see (between ads) the place in which you will see new SMS received for your mobile phone.

- Refresh the page if you want new numbers.

- Enjoy !

Support :

- Please support me by sharing the website to the maximum.

- Please Click ads on the website, it's the only way I can pay for fees and keep the service up or donate.

- Please Post here your experiences with the website, along with services that worked and didn't work for which phone numbers.

Enjoy it and thank you !

Thanks !

Nice share!! [isubscribe.ma](#) is a nice tool! :)

Tempurz_x - February 19, 2015, 9:21 pm

This seems like a great tool! 10minutemail for SMS verification!

markzuckerberg - February 19, 2015, 10:43 pm

Wow.. this website is so useful! but i don't think facebook nor gmail can accept those numbers.. But anyways nice share buddy!

Foundatons - February 19, 2015, 10:45 pm

Appreciate the Contribution, i wont use myself but good none the less.

RelationShit - February 19, 2015, 10:45 pm

Can you add other countries for free? UK and such.

FRANKIE - February 19, 2015, 10:46 pm

Damn thank you for sharing this! Has been bookmarked!

Samk3r - February 19, 2015, 11:12 pm

Thanks bro thanks for sharing book marked your thread !! Will check later

Just make an account from a tablet / ipod, You won't need a phone number.

tron - February 20, 2015, 1:42 am

doesn't work for facebook, gmail, or yahoo; does work on outlook/hotmail.

Linus Torvalds - February 20, 2015, 5:57 am

It works and is accurate. Nice one. ?

prefight - February 23, 2015, 6:07 pm

I really enjoy this. Works like a charm and is going to come in handy plenty of times for me, I can tell! Cheers!

Nikolayev - February 23, 2015, 6:13 pm

I'm glad you've enjoyed it guys ! please spread the word and support !

Update(25/02/2015) : 5 New numbers added to the website. Don't Forget To Support us !

tembende - February 25, 2015, 9:35 pm

this really nice...keep it up. i really appreciate ur work... im gonna try it right away

SIM-1673779 - February 26, 2015, 2:57 pm

wow fantastic work, not only is the look great but it works great too! Does not work for google, yahoo or facebook but I could not care less about them anyway. Thanks for the share!

Gasric - February 27, 2015, 1:23 am

Interesting tool, will be testing this out.

Nikolayev - February 27, 2015, 8:59 am

sure, enjoy it guys and thanks for the feedback please don't forget to support !
