Simply amazing. Im loving how fluid the waterfall animation is, whilst keeping the size of the file small, thread fits perfectly with the dimentions of the forum.

Design is lovely, im really feeling the flat theme with that touch of a frosted nature theme!

Keep up the great work!

Loving the waterfall looks great! although i would suggest you make the payments part a bit smaller, it's too big.

I really like it, it's simple, clean, and elegant.

My only critiques would be that the feature background texture doesn't match the clean look you're going for; it has a very grainy feel, and I think the feature descriptions within that section would also be better accompanied with a few placeholder icons above them.

The payments section is more of a quick look, so I would suggest lowering the height of that section and bringing the title a little closer down to the images.

Both the Skype and email icon might look better if they didn't have that inner transparency, and contained their original colors. Remember, the consumer is skimming - not interpreting. The less thinking they have to do, the more you've sold them (and bring the social media icons and descriptions a little further up).

Very nice job though!

Thanks for the share m8. For some odd reason when I click on the hyper link it takes me to a wrong link. When I copied and pasted the link everything went fine.
