Thread: [VBScript](#)

tommy4702 - February 20, 2015, 8:06 pm

im attempting to make a bot (im not going to say what it is) and i need it to click the Date of birth and fill that out but dont know how (this is my first day of VBS so ima noob) and thats all i need to do aswell

Sajuuk - February 21, 2015, 5:00 am

I'll bring the only VBScript "expert" here to you via PM.

White Light - February 21, 2015, 5:24 am

I'm definitely no expert in vbs. If what you're trying to do is what I think you're trying to do (fill out a web form automatically and submit it) please post what web address it is and I will take a look.

Hash G. - February 21, 2015, 5:29 am

Try this code :

PHP Code

<?php

```
Set IE = CreateObject("InternetExplorer.Application")
set WshShell = WScript.CreateObject("WScript.Shell")
IE.Navigate "your.website"
IE.Visible = True
Wscript.Sleep 6000
IE.Document.All.Item("id_username").Value = "username"
IE.Document.All.Item("id_password").Value = "password"
WshShell.AppActivate "IE"
WshShell.SendKeys "{ENTER}"
```

It will open an IE window and go to the URL setted in "IE.Navigate". Then, it will fill the inputs which the HTML ID is defined in "IE.Document.All.Item" with the Value you say. Then, it will press Enter to valid the form.

Edit : I've tested it, it works fine !
