Skype Spy USB Edition

Spoiler ([Click to View](#)) software allows you to monitor and track all Skype chats and activities, such as file transfers or calls. You can search monitored Skype data, make copies of data, and restore the data as well. Best of all, Skype Spy USB Edition is portable — you can easily run it from USB flash drive and use it on any computer without installation. In this way the app stays completely undetectable. It is a great option for anyone looking for an effective parental control solution or employee monitoring software.

To get it PM me or Post here.

Good day.

?

NOTE

Spoiler ([Click to View](#)) This is not a crack or a serial totally official.
