You can't ask for rep, and you have to post a virustotal link.

Edit : VirusTotal 14/57. Do NOT download this.

This guy is lying! 100% Bullshit.

This program is not free, and he is not the owner of this program either.

Here's proof: <https://imgur.com/a/cxgR3>

Be careful guys, don't download he might have binded his shit with it.

I have found the original thread, from this program:

Post a virustotal. Avast detects it as a virus.

dadada12 - February 22, 2015, 5:49 am

this is hacktool you are surprised ?

Hash G. - February 22, 2015, 6:17 am

Sentry MBA is a hacktool, and isn't detected by AVs.

So, you basically :

- Leaked a tool
- Binded a stub in it.

Do you ?
