Thread: [darkbooter vs other/darkbooter is back](#)

Mild1738 - February 22, 2015, 12:39 pm

Hey guys I bought darkbooter a while ago and it didn't work so went to a bot net and it wasn't that strong then I tried darkbooter and it works again finally! But comment witch booter u think is better but so far darkbooter is back and it hits hard it takes down servers etc fast

Manyaco - February 22, 2015, 12:41 pm

Not even sure if Darkbooter is still worth it, but you can check out <http://powerstresser.com/> or <https://www.vdos-s.black/>. They hit pretty hard and the prices aren't too high...

tycowinner - February 22, 2015, 1:54 pm

My personal opinion is not to buy booters. If I where you I would probably make my own botnet i'm not an expert but i'm almost 100% sure that a botnet would work better than darkbooter.

Levi - February 22, 2015, 2:23 pm

Buying a stresser for non-ethical reasons is pointless.
