Thread: [Photoshop - Thread Design Splicing Tutorial \[Make "buttons" in your thread design\]](#)

Hydra - February 23, 2015, 4:13 pm

A user on here asked how to make thread design buttons in Photoshop so I decided to make a tutorial for it.

Hope you learn something from this, enjoy!

Amazing, tutorial there were a few parts I just didn't get what you did, but I think I'll figure it out.

Would be nice if there was a commentary over it or something.

Send me what parts and I'll add annotations. I couldn't make a commentary the day I made it. : /

Annotations/Commentary would've helped a ton, but the tutorial is really good anyways, I really enjoyed watching and learning from it.
Thank you!
