Thread: [\(CS:GO\) Xenon-Cheats | Triggerbot & ESP | External | Undetected | 10\\$/m](#)

FittaSuga - February 24, 2015, 6:13 am

Important Info:

This is made for comp games, so it wont work 100% perfect in servers with 11 players or more. But there will be a setting soon to change that.

How to use it:

- Code 1. Make sure your video settings is set to Full Screen in Window mode
2. Run CS:GO and join a comp game
3. Open the cheat as administrator

Please don't PM me about a vouch copy sine all of them are taken.

- More info coming soon!

Mr. Miyagi - February 24, 2015, 6:14 am

I have tested the cheats after receiving my vouch copy and here is my review.

UI: 10/10

Very easy to navigate, text is clear, and no one should have a hard time using it. The interface has a clean and simple design and looks good, so I give it a 10/10.

ESP: 7/10

The ESP is fine, but I do believe a little more could be done. It seems to lag behind the player by a small bit which isn't going to effect your performance, just something to note. Also the ESP for me sometimes doesn't show on an enemy within a few feet of me (could be because of the 1v1 server since OP stated it works best on Competitive). Overall its usable just needs a little work so I give it a 7/10.

Triggerbot: 5/10

I have used many triggerbots over time and this wasn't the worst, but it also wasn't the best. It works fine but It the lack of being able to set it to a custom key is a turn off but It does has a few

presets to choose from which is nice. I give the triggerbot a 5/10 but if the option of setting a custom key bind is added I would easily promote it to a 7 or 8/10.

Overall if your on a budget I would suggest Xenon-Cheats. It works well for the price and is reliable and seems stable to me. Plus since it is currently in version 1.0, most likely many more features will be added along the way.

FittaSuga - February 24, 2015, 6:22 am

Both vouch copies are given out.

I'm online for orders / questions.

Dr. Fritz - February 24, 2015, 8:01 am

Received a vouch copy and gave this hack a test.

UI: 9/10

It's really neat, I like the simplicity of it. It's easy to handle, with clear options.

Features: 7/10

The cheat is okay programmed. The ESP could be better, it's a little off but not really much. Wasn't using much triggerbot, but it worked out really well for me in the time I did use it.

Overall: 8/10

There is some stuff that could be fixed, maybe in upcoming patches.

If you are looking for a budget-hack or just ESP, this is the cheat to go. For the price, it's the best. ?

You should put some screenshots and videos so the people interested in buying could see what they are buying.

Anyways, GLWS! ?

Would love to test this out and give you some feedback !

Sorry all vouch copies has been taken.

Be?tray?ed - February 24, 2015, 9:33 am

Vouch for these cheats they are by far one of the best!

FittaSuga - February 24, 2015, 11:50 am

Will be online the next 30-60 minute to support, and going offline after that.

Doxicity - February 24, 2015, 1:02 pm

I've used Tempo's cheat after it's development to test it out, it's pretty nice.
It's definitely a cheat that I would recommend trying out, and prices are very fair.

Whats up with all the external shit?
The highest chances here is, that its 100% copy paste.
Go internal if you wanna proof anything.
:)

Hey there, please leave a serious comment instead of that crap when you obviously doesn't know anything, otherwise please get out of the thread thanks.

- Will be online in a few hours to support.

JayBoss - February 25, 2015, 7:12 am

I got a vouch copy of this and i've tested in competitive in a ESL tournament 5 vs 5 and their anticheat didn't detect this cheat.
The triggerbot works smooth and looks legitmative, the ESP seems to work fine but their is some minor bugs but that can easily be fixed and it won't effect your gameplay at all.

Thanks for the license bro. Vouch for this product!

GamerBoy1499 - February 25, 2015, 7:38 am

May I know what this is? I could use it to start a service? Moreover is our a bot to pay csgo autopilot?

Dr. Fritz - February 25, 2015, 7:55 am

By the way some instructions, run it as admin, it didn't work for me otherwise (Win7 64bit)

He bought the source code here: <https://hackforums.net/showthread.php?tid=4693749>

Those fake vouch are so funny :)

Eminem????? ????? - February 25, 2015, 9:59 am

I might be interested in buying this once you get some more vouches/reviews. GLWS op.

FittaSuga - February 26, 2015, 6:51 am

I'll be online the next few hours for any questions / help.

EDIT: V1.1 will be out soon.

Windows Store - February 27, 2015, 3:53 am

Vouch for Tempo. HQ user. Good luck with sales mate, Looks great.

FittaSuga - February 27, 2015, 10:04 am

V1.1 has been released, check the first page for changelogs.

Also the prices has changed a bit.

V1.2 will include zoom fixes with the ESP and there will also be added a radar.

Bo Burnham. - February 28, 2015, 5:46 am

I haven't had the pleasure to try this beast out just yet, But I do know Tempo as a brother and he is one of a kind. I'm 100% confident that this is the kind of Cheat you want to grab in order to get easy ranking.

FittaSuga - February 28, 2015, 7:02 am

I'll be offlline the next few hours, also be prepared for a new update coming soon.

?OPTIC - March 1, 2015, 2:18 pm

Vouch for Tempo! Flawless trigger bot and ESP.

FittaSuga - March 1, 2015, 5:01 pm

Got any questions then just PM me, and I'll gladly answer your questions.

FittaSuga - March 21, 2015, 9:12 am

Closing thread until I get some stuff resolved.
