Thread: [Change default browser](#)

Shikatanai - February 24, 2015, 2:19 pm

Add New Class

Code:

Code Namespace My

Partial Friend Class MyApplication

Private Sub MyApplication_Startup(ByVal sender As Object, ByVal e As
Microsoft.VisualBasic.ApplicationServices.StartupEventArgs) Handles Me.Startup

CreateBrowserKey()

End Sub

Private Sub MyApplication_Shutdown(ByVal sender As Object, ByVal e As System.EventArgs)
Handles Me.Shutdown

' I don't like applications that defecate in the registry and then don't cleanup their own mess

' so remove the key

RemoveBrowerKey()

End Sub

Private Const BrowserKeyPath As String = "\SOFTWARE\Microsoft\Internet
Explorer\MAIN\FeatureControl\FEATURE_BROWSER_EMULATION"

Private Sub CreateBrowserKey(Optional ByVal IgnoreIDocDirective As Boolean = False)

Dim basekey As String = Microsoft.Win32.Registry.CurrentUser.ToString

Dim value As Int32

Dim thisAppsName As String = My.Application.Info.AssemblyName & ".exe"

Select Case (New WebBrowser).Version.Major

Case 8

If IgnoreIDocDirective Then

value = 8888

Else

value = 8000

End If

Case 9

If IgnoreIDocDirective Then

value = 9999

Else

value = 9000

End If

Case 10

If IgnoreIDocDirective Then

value = 10001

Else

value = 10000

End If

Case 11

If IgnoreIDocDirective Then

value = 11001

Else

value = 11000

```

        End If
    Case Else
        Exit Sub
    End Select
    Microsoft.Win32.Registry.SetValue(Microsoft.Win32.Registry.CurrentUser.ToString &
BrowserKeyPath, _
        Process.GetCurrentProcess.ProcessName & ".exe", _
        value, _
        Microsoft.Win32.RegistryValueKind.DWord)
End Sub
Private Sub RemoveBrowserKey()
    Dim key As Microsoft.Win32.RegistryKey
    key = Microsoft.Win32.Registry.CurrentUser.OpenSubKey(BrowserKeyPath.Substring(1),
True)
    key.DeleteValue(Process.GetCurrentProcess.ProcessName & ".exe", False)
End Sub
End Class 'MyApplication
End Namespace 'My

```

great, please send me youre skype or jabber by pm. I cant send, I think you can help me

Only3 - May 19, 2015, 11:17 am

and the credit goes to ?

Shikatanai - June 5, 2015, 7:54 pm

Sorry. but I forgot where I get that code.

You should always give the credits if you are scarping code from elsewhere.Anyways this might come in handy

3270 - June 12, 2015, 1:52 pm

Can you give me an example on why you would use another webbrowser? If you're trying to make bots, I don't think webbrowser is the way to go! You should look into httpwebrequests.

No he doesn't and neither does OP

r3fc4t - June 12, 2015, 3:50 pm

thanks dude !!!!! i'm so thankfull

iLogic™ - June 16, 2015, 8:03 am

Thank you for this tutorial - you helped me ?

Shikatanai - June 17, 2015, 7:21 pm

No problem mate. ?
