Thread: [YouTube award not visible in PC but visible in mobile browser](#)

Jinu - February 25, 2015, 8:31 am

Hello, recently I'm facing the problem in hackforums that YouTube award is not visible in PC browser but visible in mobile browser.

Myself and everyone's YouTube award image/icon is not visible in my browser. I use Chrome browser.

But when I browse in mobile, It is visible. I use Internet Explorer in mobile.

I already cleaned these things in my chrome browser:

Still it shows nothing. This is how it looks:

Note: If any thread(s) has been created regarding this problem, please ignore this. I'm Sorry.

You're using adblocker. Adblocker doesn't like social icons.

Whitelist *.hackforums.net.

Browithaquestionmark - February 25, 2015, 9:02 am

Try disabling your adblock and then do a hard refresh (f5)

Whitelist *.hackforums.net.

I just un-whitelisted HF from Adblock and I can see the icon.
