Thread: [Looking for a booter that can drop League of Legends games](#)

idkthegod - February 25, 2015, 1:07 pm

As the title says. I'm looking for a booter which is able to drop League of Legends games.

I'll give you the IP and Port of my current custom game to check if it works. PM me if you're interested or write here.

Deko - February 25, 2015, 8:42 pm

Most booters can take down LoL games, you just gotta find the IP.

?Syria - February 25, 2015, 8:51 pm

1. Don't get nulled stressed sucks! can't even take out a simple website or home connection

Manyaco - February 25, 2015, 8:52 pm

I wouldn't suggest you dropping league servers, as you can risk your account in getting perm banned.

try k-stress. pw / login.php they hit really hard, and will take the server down, and btw if you are going to take down the server and then when they catch you, you will pay them around 500.000-1.000.000\$ because you took down one of there server XD

Dont think so lol. They have no proof that it was me, since it doesnt come from my ip.

idkthegod - April 5, 2015, 8:13 am

BUMP. Still looking for one. Im sure someone can help out.

It's easy. I know how to. But I'm sure your booter wont drop it because it needs a special way of

attacking the server to drop it which is unknown. I can give you the IP and port of a custom game if you want to test it.

Marklike - April 5, 2015, 8:25 am

idkthegod i'm interesting to take down a server of lol , i have a program that can catch the ip when u are in game but i need a dossier for take down the server .sorry for bad english

idkthegod - April 5, 2015, 8:26 am

Lol I got that aswell. I'm looking for a ddoser aswell.

Bitdefender - April 5, 2015, 8:28 am

It's not hard to find the IP. It's hard to use Wireshark.

And yes, if you actually f*ck up one of their server, they will find you... Not Rito, I mean the po-police.

BUT hey, what can you even do? "Looking for a booter that..." every booter can take down something, so far the booter actually is set up for such an action and the hit is strong enough.

You think that over 100'000 people a day play on one single gameserver?

Marklike - April 5, 2015, 8:29 am

can u add me on skype? we will talk and we can find a solution

idkthegod - April 5, 2015, 8:30 am

You think that over 100'000 people a day play on one single gameserver?Ok then explain me how they're supposed to find me if I drop it over another IP. I mean there are 10 people in a game they cant tell who did it.

Marklike - April 5, 2015, 8:33 am

we can try to buy k-stress .pw for trial cost only 1 dollar and we can try if can down any server

idkthegod - April 20, 2015, 3:56 am

BUMP. Still looking for one. Im sure someone can help out.

nTDI - May 6, 2015, 12:09 pm

Dont think the waay you want to do it works anymore, via processhacker / wireshark, got a really really strong booter, nothing happens if I DDOS the right port / ip
