Thread: [\[SPECIALISTS\]\[FREE SCANNER\] ReFUD.me { NO-DISTRIBUTING | SAVE SCANS | NO WAIT | API}](#)

Kill?Muvz - February 26, 2015, 9:36 am

WE HAVE JUST REACHED 440,000 SCANS! CONGRATULATIONS EVERYONE!

We have added 2 new features!

- You can now save your scans by simply entering a memorable word/username or identifier before scanning!

Scans can be retrieved by visiting www.reFUD.me/history.php :)

- ScanWatch. What the detections on your files, we will monitor all your files for you and keep you updated and it only costs 1\$!

API is now complete. If you wish to use it PM me :)

API examples also include a TEXT version.

Click the image to be directed to the scanner.

Any questions use the PM button bellow.

All feedback is welcome.

SHA1 is a bit off, comes out of the side sometimes.

Design isn't the greatest, I personally don't like a left sidebar for anything.

The image for scan results is too far over to the right (for my liking).

Either way, all personal preference shit.

Very lovely service. Super fast and you even allow apps to auto scan (made my own).
Let me know if you get an api out.

Could you show me an example of the SHA1 issue?

I quite like the left sidebar, but I am aware of the lack of centering. (did you mean left instead of right?)

Shouldn't be long till I release it, maybe next week.

On 1920x1080

I mean the results image should be closer to the left sidebar >_<

I need to center it better cause on mine is more to the left haha. I will get that fixed today. When you meant the SHA1 issue I thought you mean on the result picture.

Thanks for the feedback

LynS - February 27, 2015, 10:41 am

I have just tried it out and it is awesome. I must say nice product once again.

Kill?Muvz - February 28, 2015, 3:01 am

Kill?Muvz - April 22, 2015, 12:14 pm

We just reached 87k scans with 4k daily visitors :)

exiledfrank - April 22, 2015, 1:42 pm

I'm always scanning with this website and it works just fine, Thank you Kill?Muvz for bringing this website to us.

Aurora - April 22, 2015, 2:06 pm

Glad to see this is still growing strong.

Comedic - April 23, 2015, 3:41 pm

Wow I thought this was a paid scanner this whole time. You have a few paid features, right?

No we don't have any paid features at all my friend :)

Kill?Muvz - April 29, 2015, 12:24 pm

We reached our 100 thousandth scan! HURRAY!

Updated some things on the scans so now there won't be a collision on results.

Working on the desktop app as we speak, would you guys use it? :)

.Crypter - May 1, 2015, 5:36 am

Wow this actually worked, thanks OP.

grates - May 3, 2015, 5:45 pm

I love this!

A great contribution to the community.

Kill?Muvz - May 3, 2015, 5:53 pm

Currently on 111k scans. Scanner is getting bigger and bigger. Atm working on a scan history module so you can save all your scans.

Gasmic - May 3, 2015, 10:09 pm

I'm working on developing a Crypter and this would be incredibly useful.

Thanks! :D

Kill?Muvz - May 4, 2015, 6:20 pm

We have added a new feature! You can now save your scans by simply entering a memorable word/username or identifier before scanning!

Scans can be retrieved by visiting www.reFUD.me/history.php :)

Kill?Muvz - May 6, 2015, 3:35 am

Sorting out a new server for reFUD.me, some of the most recent scans might be lost but il am doing my best to minimize the loss.

If you experience any downtime/error/missing scans for the next few hours do not worry, this is because we are moving servers.

I hope you are having fun, retrieving all that important information loool.

Kill?Muvz - May 8, 2015, 4:19 am

Successfully transferred over to the new server and everything is running smooth.
Just finishing transferring over some results.

Kill?Muvz - May 11, 2015, 7:21 am

We are close to reaching 140k scans (I deleted a few thousand scans but I don't know the exact amount). Soon we will introduce some new features such as Scan Watch. If you have any other suggestion please let me know!

Archer - May 11, 2015, 8:17 am

Not that Killa needs it but huge vouch, known him from back in the day and his products are always top notch. This scanner is my go to tool.

Archer - May 13, 2015, 7:14 am

Absolutely, if I recall there was a service that had this way back and it was very helpful for me.

Kill?Muvz - May 14, 2015, 8:55 am

Scan watch is almost done :)

We will be charging 0.50\$ to 1\$ BTC per scanwatch. Would that be an acceptable price?

Okay, but if you clean your computer right, and used btc you have no paper trail left.

Yeah...No... Bitcoin can be traced if you aren't careful, found this example in a Forbes article:

Quote:"There are ways of using Bitcoin privately," says Meiklejohn. "But if you're a casual Bitcoin
user, you're probably not hiding your activity very well."

I'd like to see the article you are talking about...

As said here, the resources to attempt to backtrace a bitcoin wallet won't just be used on anyone, they'll either be invested into the "low hanging fruit", or those that are massive darknet drug kingpins. It doesn't often happen, but every trace of an address left can ultimately lead back to you, but it's just not worth investigating for someone selling something like this.

Scanning files for malware isn't illegal. You got nothing to worry about.

But yes, it is a shame. Hackforums has lost who could easily be (unless xCocaine is better) their
best affordable cryptologist (The Old Warrior is the best but expensive as hell.)
