Thread: [Debug }:{ Recruitment for coding helper }:{ Anyone can apply!](#)

'Snorlax - February 27, 2015, 12:46 am

Hello, fellas.

We in Debug are looking for someone to help. Since I am the only one who will be taking a crack at this new idea, I need someone to bounce ideas off to.

I need someone who is innovative and who knows how to think new. Someone who can listen to ideas and give their honest opinion.

When applying, make an application where you tell me what you can offer. As said, I need help figuring out new ideas.

If you can show me ideas in a PM as well, you have a bigger shot at this.

Ask yourself this: If you were in my position and you were to invite teachers into the group, what would you ask the teachers to do?

What would the recruitment for Java, Python, C#, etc. look like for the teachers to apply with?

Anyone can apply and will be invited to the group.

This recruitment will end on Sunday the 1st of March.

Apply away!

Embargo - February 27, 2015, 12:56 am

I can give you honest feedback on your ideas, and hopefully think of a few that we can discuss and possibly use.

I sent you a message with a possible recruitment idea, if that doesn't work for you then I'll think of another.

Thanks.

FRANKIE - February 27, 2015, 12:58 am

Hey Snorlax you probably aren't looking for learners but I am really interested in trying to learn user-scripts & such. If you have any room let me know but if not best of luck finding helpers!

'Fox - February 27, 2015, 1:07 am

(Feb 27, 2015 01:58 AM)FRANKIE Wrote: [\[CITE\]](#) Hey Snorlax you probably aren't looking for learners but I am really interested in trying to learn user-scripts & such. If you have any room let me know but if not best of luck finding helpers!

We will have a recruitment for the learners soon.

Cooligan - February 27, 2015, 1:12 am

(Feb 27, 2015 02:07 AM)Porygon Wrote: [\[CITE\]](#) We will have a recruitment for the learners soon. I think I speak for many when I say I hope soon is very soon. ?

'Snorlax - February 27, 2015, 1:16 am

This isn't a recruitment thread for students. I need someone, THAT SOMEONE, who can help me handle this. Someone who knows their stuff when it comes to management and dealing with things like this

Please keep everything off topic out of this thread.

Thanks

Sacred Symmetry - February 27, 2015, 4:57 am

Well, weather you consider me a good candidate or not, here it goes.

Im Wesley, a 17 year old 4th year java student. I have quite a broad knowledge when it comes to java and i do not cut corners.

I am open minded, and i am not afraid to point out any issues that i might come across.

I think that i could make a good edition to your team.

Kind regards

Cyrus - February 27, 2015, 4:59 am

Sick graphics for the group, goodluck.

RainSpider3000 - February 27, 2015, 5:04 am

Hey there Snorlax.

I would love to join the group, I think I would fit in well with my excellent C#, LUA, and PHP coding skills. I can offer a lot of things, just look at how far I took HackThatAPI! I'm still working on the HackThatAPI project so its expected to become even larger sometime this year. As for new ideas... I already have made some nice private applications for me. And do it when ever I need something done fast.

Some of the few things I have done in the past few months:

C#:

- Mass pizza hut coupon code finder
- Skype Bot
- IRC Bot
- IRC Chat client
- HTTP Post Data Flooder
- Website Scanner
- HackThatAPI Server application (hosts all hackthatapi.com tools - written in c#)
- Tcp flooder
- & more...

PHP:

- IRC Bot (Yes really, took me a while though.)
- Email spammer (basic, anyone can make one)
- mini forum (Had basic posting functions, and registration, small admin panel)
- HTTP flooder (actually worked well, used loops to the script activate more than one thread)
- & more...

LUA:

- CLI booter (used apis)

- Helped a friend develop an indie game, coded in lots of LUA. (Fallout Redemption)
- Auto Script Starter (application to start lua scripts at certain times)
- Server down SMS notifier (tells you via sms when a server is down)
- & more...

I also know a bit of VB.net, moderate HTML & CSS (its not a type of coding language!), java, and python. I am currently interested in learning c++.

Anyways Snorlax, if you want to choose me to join the group, (I know... I always give away all of my stuff for free & should be selling it. Like always...) I will give you all I offer. I have no problem teaching noobs or novices how to code. As long as they don't ask me the same question over and over after I have already answered it, I will teach them to my best ability.

As for ideas, I can think up a storm load of them, however I don't want to list them here for someone might legitly just come and steal the ideas I list. Mainly when I think up ideas like applications, its when I am bored, because most of the time, I will be coding all day. If you want some ideas via PM, let me know. I trust you snorlax.

Have a great day,

RainSpider3000

ZtecGamer - February 27, 2015, 5:05 am

hit me up a pm very interested in this pal

LessThan3 - February 27, 2015, 5:07 am

Good luck with your search. Your banner is amazing by the way.

?homas - February 27, 2015, 5:13 am

(Feb 27, 2015 02:07 AM)Porygon Wrote: [\[CITE\]](#) We will have a recruitment for the learners soon. Awesome, I am very interested in learning as I have no skill in anything at the moment. ?

'Snorlax - February 27, 2015, 5:17 am

Only two people out of probably 10-15 applicants answered the question in bold. Before I would even consider your application, reply in a PM or in a post with your thoughts on that.

'Snorlax - February 27, 2015, 5:24 am

(Feb 27, 2015 06:20 AM)Yani Wrote: [\[CITE\]](#) -snip-

I appreciate your honesty. I've always been taught using the theoretical first then followed by an example. That's the kind of way I like being taught, and I know a bunch of languages now.

If you wish to discuss further, feel free to send me a PM.

Roger Waters - February 27, 2015, 5:29 am

Good luco to everyone that applies to this, only the best candidate will be accepted.

Teh Afro - February 27, 2015, 5:46 am

Actually got some decent ideas for this. Sent you a PM.

Declan? - February 27, 2015, 6:42 am

I know I can't offer much, but I can help you with stuff like thread designing and graphics. PM me if you need any help.

D3xus - February 27, 2015, 7:31 am

What Can I Offer?: A great deal of web design experience, including the following coding/markup languages:AJAX

CSS

HTML

Javascript and jQuery

mySQL

PHP

Other object-oriented programming skills include:C++

Java

Python

I have a lot of experience managing and organizing events, groups, and things similar to Debug in nature. I was a leader of Techsperts for quite a while, and ran the Wiki team for several months as well.

Teachers who wanted to be able to help and mentor students within the group would have to prove their mastery in whatever coding language it is they'd like to teach. I'm not saying they need to code a orbital launch simulator or anything extensive, but they need to wow me (and you and 'Porygon) with their abilities. What makes you a better coder and teacher than other applicants? What can you bring to the table that others cannot? This would change depending on the language they want to teach. For web developers, a fully responsive and aesthetically pleasing website (HTML, CSS, PHP if they like). For object-oriented programmers, a program that exhibits all of their greatest skills within the scope of that language. I'm not interested if they can comfortably code in a few languages; I want to know if they're masters in one language. There are a few other criteria and milestones they need to meet, as well.

The teachers need to be able to teach effectively and fix errors. If these teachers are going to be mentors and leaders to help others code, they need to be able to find errors in code, even if they're small and insignificant. I'd give them a block of code for their chosen language and ask them to find and repair all errors present. I would also want teachers to give me a mock lesson plan for the very first lesson they would teach with their language; I want to be able to judge how they think and what their methods of teaching are, and if they're effective or not.

MrOrang - February 27, 2015, 8:10 am

Uhm just leaving some feedback on your ideas here.

I think that this group should not only focus on teaching people but should also hold coding projects and stuff like that as I do not think people would want to join so they can go and teach someone something.

Oh and is this thread also here to apply for your programming skills? If so I'll apply for Java

developer.

Mr. WAVES - February 27, 2015, 3:01 pm

I have a question, if I apply as a Helper and you do not choose me, can I apply as a learner later?

Edit:

Here's my application

Who am I? I'm a 20 years old IT student that lives in Canada (french Canada)

I'm born in Romania

I speak English, French and Romanian

IT student.. huhh? What do you learn? I learn networking. I learn how it works, why it works like this, troubleshooting and how to fix it.

To let you have a better idea of what I'm learning, I'll tell you about a well-known HF member that studies the same this as me, but he started before. His name is Aura.

OK but why do you apply here? Because I know how to code (not an expert, but I do) and at school I help a lot of people that needs help Web languages that I can help with: HTML

CSS

PHP

MySQL

Programming languages that I can help with: Python

Delphi

JavaScript (learning right now)

Command line interpreters that I can help with: Bash

Batch

OS that I can help with: Ubuntu

Windows 7

Windows 8

Windows 8.1

Android

Under Debug }:{'s name I can:White tutorials

Focus on a section and try to answer all their questions

Post HQ posts

(Feb 27, 2015 04:01 PM)YOLOOnline Wrote: [\[CITE\]](#) I have a question, if I apply as a Helper and you do not choose me, can I apply as a learner later?

If you get denied here, it won't affect anything when you apply for a learner later.

Kingstonz - February 27, 2015, 3:09 pm

I think i could be a asset to debug if anybody needs coding in PHP, HTML, CSS, json, VS or VB I'm your guy I just really don't post about it I do not like to brag at all I can help someone fix BROKEN code and help them do other things I could be a really good ASSET to Debug!

Thanks for giving me the opportunity to apply,
?????

B?ng - February 27, 2015, 3:12 pm

I am not the best when it comes to programming, I am quite new to it and I know very simple html.

But when it comes to original ideas and such I'm pretty good.

I have come up with quite a few really cool ideas, some of which implemented into large projects I've helped work on and I'd absolutely love to help out with doing this.

Seems like a great chance to make a group that does things new and keeps ideas coming which I love :)

Crypto™ - February 27, 2015, 3:17 pm

I'm actually going to go for this, because for once, I feel like a group has a chance to do some real good for HackForums as a whole.

If I were in your position, I would look for teachers with not only a preponderance of knowledge, but a willingness to share it with others without incentive. I'd look for teachers like myself who already are actively helping members of the community for no reason other than to help. E.g. Like Aura did. To further determine who is willing to help, for recruitment, a small* coding challenge would be in order, to determine their development style, how adept they are at learning new technologies, and explaining their code to someone who would have relatively little knowledge of it.

Personally, I have almost seven years of experience in web technologies (albeit the first two were mainly focused on HTML/CSS) and I've been teaching friends and strangers alike the basics of web whenever they wish to learn. I'm not going to say too much more about myself, since I don't want to trumpet achievements that simply aren't true, so I'll allow my Github to speak for itself.

<https://github.com/caffeinewriter>

Thanks for reading, and even if I'm not accepted, good luck with this group! It's one of the few I've been legitimately excited to see.

I actually speak korean, why did you put the formal greeting at the end of your application?

Crypto™ - February 27, 2015, 6:36 pm

(Feb 27, 2015 07:03 PM)Phrontier Wrote: [\[CITE\]](#) I actually speak korean, why did you put the formal greeting at the end of your application?

I'm guessing it's because that's their HF name as well, so they're technically signing it with their name :P

Freddy K. - February 27, 2015, 7:09 pm

you should let people buy in as a learner, and it would kinda be like a programming learning environment "course", or "courses". I would so buy in. I'm taking AP computer science right now in my school, so I'm always willing to learn more about coding :p

Mr. WAVES - February 27, 2015, 7:11 pm

What do you mean by management? As in running the group. If that's the case I'm very well organized and like to prioritize my day to day scheduled on whats important I never fail to get the job done.

Grin - February 27, 2015, 9:22 pm

I'm very willing to lead this group without asking for payment of any sort!

Fox™ - February 27, 2015, 10:00 pm

I'm Vanilla.

I like to make change. I'm an innovator, and a dreamer.

Creativity matters within anything, and I'd love to help judge it.

What I can offer:Dedication

Trustworthiness

Honesty & Integrity

Fluent in PHP, HTML, and CSS.

Willingness to learn.

A bright mind to work with.

I'll PM ideas in the morning.

haydrazs - February 27, 2015, 10:10 pm

I have a really good new idea, you should get a different userbar. @sean. lol.

Don't think you quite know what he's talking about.

Legion. - February 27, 2015, 10:25 pm

I sent my application via PM to you 'Snorlax! Thanks!

SoldierX - February 27, 2015, 11:25 pm

I have been coding for last 4 Years in C/C++ and have learned basic java as well. Apart from coding I have been doing graphics over this forum since last 2 years (Might come handy in managing external affairs for the group).

I can help find and create assignments for the group that are interesting and may help students in learning with fun and excitement.

Apart from all the above, I have been looking for an opportunity to manage group and the members inside it with some ideas that I had planned before for complexity and some others as well but never got a chance so I hope this might be my chance in applying all the things that I have learned.

Thank you.

Tomaten - February 27, 2015, 11:58 pm

I can't wait for teachings to begin. Please inform me Snorlax when they do. I want to learn how to code badly, and this is the group I've been waiting for.

Good luck all who apply!

Gustav. - February 28, 2015, 5:36 am

I am looking to learn how to code, 'Snorlax you promised me that you'll teach back when The Guardians was a thing but you never did! You owe me.

Deadbyte - February 28, 2015, 9:42 pm

I am a competitive programmer who has won multiple awards and medals at the International Olympiads in Informatics.

My speciality is solving algorithmic problems.

Short info:

Age : 18

Field of study : Computer Science

Fluent in the following languages : Java, C++, C, C#, Visual Basic, Pascal.

Experienced in web programming/design : HTML, CSS, JS, PHP, MySQL, AJAX, Dreamweaver, Wordpress, Joomla etc.

Experienced in graphics : Photoshop, Flash, Corel Draw etc.

theoldbrit - February 28, 2015, 9:51 pm

Can't wait for the recruitment thread to be up!

Group looks great, i have much to learn , master sensei.

debug - February 28, 2015, 10:34 pm

I'll keep this short and sweet:

I've been into computers and programming since I was 11, 18 now.

My name is debug.

I'm experienced in several languages, mainly C#.

Currently taking AP Computer Science(Java).

I am a good helper.

kamika\$e - February 28, 2015, 11:48 pm

I'll private message you with some ideas I have came up with.

c x y k - March 1, 2015, 12:23 am

I'm still curious. Is the recruitment for teachers, or people whom have ideas for the teachers?

Canonsx130 - March 1, 2015, 10:16 am

(Mar 1, 2015 01:23 AM)qonda? Wrote: [\[CITE\]](#) I'm still curious. Is the recruitment for teachers, or people whom have ideas for the teachers?

He wants a co-leader of some sort. To help him manage the group activities, spit out ideas, help him expand the group, find teachers. So yeah, he needs someone who can actually manage a group efficiently, with good managerial skills.

Zettabit - March 1, 2015, 7:04 pm

Well, unfortunately for me, I don't have experience managing groups, but I do know a good deal about programming.

The group looks great so far, and I hope to see a user application thread soon. I'd love to apply. :)

?????? ???? - March 1, 2015, 8:24 pm

Well I'm on phone so can't say lots but, I'm a programmer. I am fluent in Russian, and currently am tackling projects on HF including a upcoming one which is recoding of a huge website. I know php, JavaScript, c#/c++/vb, Python

'Snorlax - March 1, 2015, 10:34 pm

Thank you guys for your submissions and ideas. An update will be out asap :)
