Thread: [\[GAME\] Earn 200\\$+ MONTHLY PLAYING a web based strategy GAME \[NO DOWNLOADS\] \[INVEST\]](#)

**mastrodocet** - February 27, 2015, 5:30 pm

Hi guys! I'm not english and I'm sorry for some grammar/write errors.

I'm new to Hackforums, and I don't want prejudices beacause I haven't rep or I have few posts. I'm here for the same your reason: make money, and get them honestly, and today I want to introduce you the game that will allow you to earn some extra money and gave me 5'000\$+ in about 2 years.

It's not that much, but I earned this money playing an awesome online game (bad graphics, but very high content). Not doing boring stuff.

This is an online strategy game where you can exchange the ingame gold for real money! For that feature you must pay a monthly subscription (3 month = less than 15\$!) and if you like strategy games like this you will start to earn what you have invested in about 2-3 days!

I like this genre and in fact I earned 200+ monthly dollars for 2 years. Playing 20-30 minutes at day, 4-5 day at week (giving some orders, building some constructions, doing some battles and looting).

Not sure if you can keep doing this stuff? The game offers you 15 days of test, after that you must choose to start play paying the monthly subscription or continue to play just for fun. This will help you to decide if the game is for you or not.

Now I'm at college and I can't continue playing this game, because I must work and study :( . So I will appreciate some referrals. Thank you in advance for that.

And remember: play this game only if you have 20-30 minutes of free time. I don't want you to waste your money!!!!

Follow this link below for an accurate game tutorial, with descriptions and strategy guides. You will find also some payment proofs, picked randomly when people asked me.

I think it's all. Other stuff is in the link above, this site is mine and it's clean! Only HTML and CSS, 4 pages in total! Bye, and thank you for the attention! ;)

PS: the website uses the Google's "+1" button. Please click on it :P :P
