Hold up there, you're just lying and taking things out of context.

I stated I have friends who live near you, and if you actually read chat logs, I indicated if he spent my money already, then I could have a friend drive to his house and just collect the money in cash. It was not a threat, you sold me a non-working product.

?????? ???? ?

did not threaten OP, he informed him that if necessary he can have a friend collect the money in person.

The wording ?????? ???? used was kinda wrong, but they quickly fixed it if you read the screenshot from them.

Also OP seems to be scamming and harassing members for Rep/Vouches he has also been Thread ing via post deletion. You can see it in reports on him.

I dont trust OP at all and feel this Report is false and should be removed.

Even though I'm in your side, you clearly threatened him either way you put it, kind of irrelevant to the whole scam report though.

Uhm, everyone whom paid for your bot said the exact same issue, but I'm the retard? OK, I'll give you programming lessons tomorrow then.

A fake scam report? Well, you realize by selling a NON-WORKING bot, it's a valid scam report right? ?

While this is a good idea. I believe there is too many people stating it doesn't work. I'm neutral on this seen as I haven't used OPs bot. I hope you both resolve this. But, I do know ?????? ???? wouldn't bullshit. And I know Highsakite has literally no reason too post on this thread considering your bot doesn't work neither. You're just butt hurt about your scam report(s)/community alerts and the fact your bots are trash.

Hope you get your money back, or a working bot I guess. This crap with Highsakite and SocialMediaSupplier has gone on too long.

Well with that message you actually sound like someone with a brain and can speak proper English so that some how changes my mind about you.... You might not be part of this social scammer team..... There is no way that fk tard could speak even close to English. So even though we had beef lets squash that shit, move on and let me help you with your product you purchased. If you cool to me i'll be cool with you. Hit me up on skype if your still having issues with your bot. Also as you can see from my vouches my bots work just fine so if there is an issue it could be your PC. Lets figure this out rather than keep bashing each other. Or if you want to we can keep this going on forever i got all day man i work from home. ?
