Thread: [Questions regarding DarkBooter](#)

I have had an IP Stresser Before and I Just got DarkBooter. My previous Stresser allowed me to randomize the ports it hit however darkbooter requires a specific one? If I hit one port would it even do anything to someone?

You have to use the right port, otherwise they won't go offline.

I Need to know these as well,  
I'm thinking of getting this booter.

Yes, you need to hit with port 80 to take them offline.

Dark booter is dead, they don't even have hitting servers.
